

PGP130 Gear Pump Series

High Pressure Performance in Small Places

Overview:

Parker's Gear Pump Division is excited to announce the availability of PGP130 Series gear pumps. PGP130 Series is designed to offer high pressure performance in a wide array of construction equipment. Its design is perfect for small construction equipment because it fits in tight spaces but also powerful enough for larger vehicles. The versatile PGP130 Series offers high pressure performance in a wide range of displacements. Try it now for your skid steer or other construction equipment. Please let us tell you more about our new, versatile product offering.
