

MISTRAL AODD PUMPS

WITH AISI 316L CENTER BLOCK

AODD MISTRAL

MISTRAL range represents the safest and most efficient solution for heavy dangerous and even explosive applications but also for process applications. The entire construction of the body pumps and of the distributor is realised in AISI 316L (low carbon content) making the pumps extremely resistant to corrosion, robust and perfect for continuous 24/24 operation.

MAIN

APPLICATIONS

- Off-Shore platforms
- Marine
- Chemical process
- Cleaning/Cement mixer sewage
- Mining

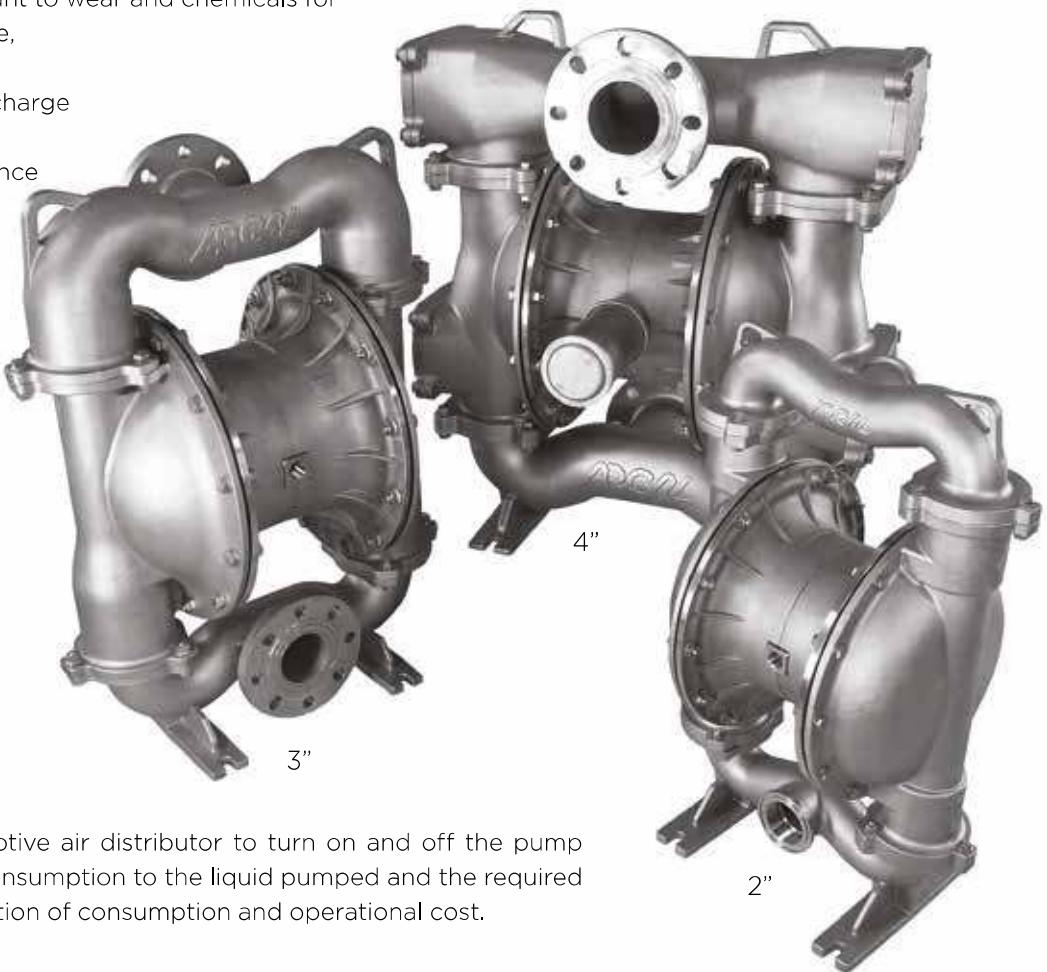

MISTRAL

200 (2") - 300 (3") - 400 (4")

The significant advantages of the distribution system designed for the **MISTRAL**:

- **simple and maintenance free 5-component construction,**
- material of construction resistant to wear and chemicals for long lasting trouble free lifetime,
- affordable cost,
- High-shift speed and high-discharge speed of the exhaust air,
- low consumption as consequence of the fine tuned air quantity supplied to the diaphragms.

"PROGRESS" VALVE

Argal designed a special adaptive air distributor to turn on and off the pump and to fine tune the air flow consumption to the liquid pumped and the required performance with a real reduction of consumption and operational cost.

(NBR, EPDM, SANTOPRENE diaphragms)

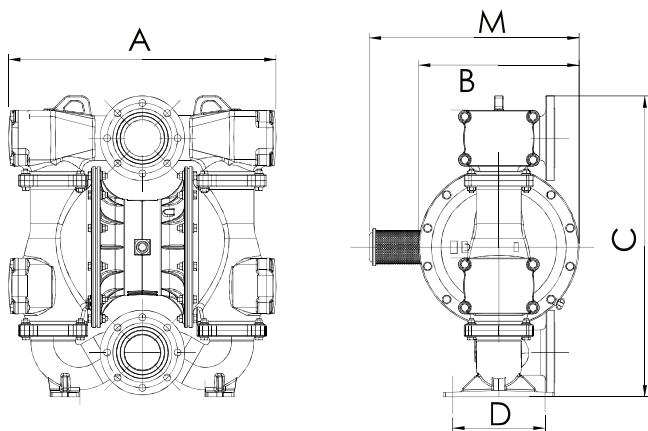

The materials used, the switching speed and the distribution spool shift speed all highly **resist to the formation of ice** that detaches itself from the surface to get then ejected from the discharge tube. Possible remaining will never affect the pump operation.
