HYDRAULIC SYMBOLS

1 - IDENTIFICATION CODE

NOTE: The solenoid valves are never supplied with connector. Connectors must be ordered separately. To identify the connector type to be ordered, please see catalogue 49 000.

2 - CHARACTERISTIC CURVES (values obtained with viscosity 36 cSt at 50°C)

3 - SUPPLY VOLTAGES

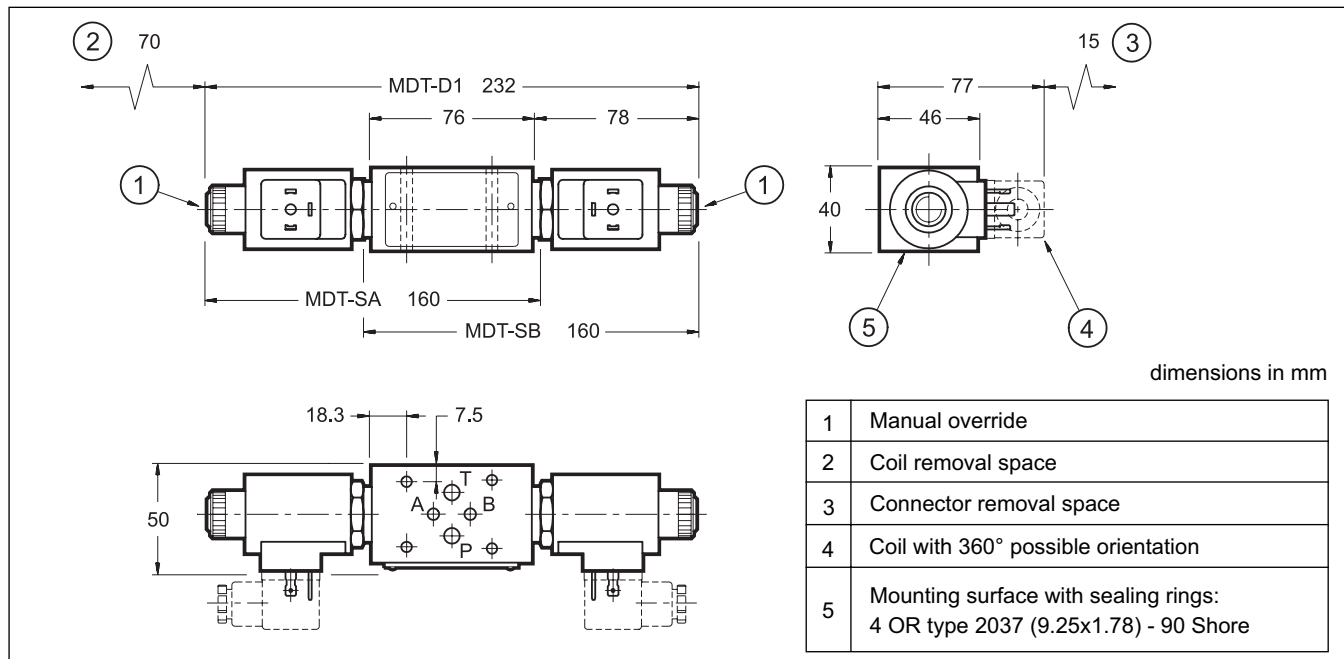

A connector with bridge rectifier and RAC coils are always used for alternating current supply.

Times ±10%	
Energizing	30 ms
De-energizing	50 ms

4 - HYDRAULIC FLUIDS

Use mineral oil-based hydraulic fluids HL or HM type, according to ISO 6743-4. For these fluids, use NBR seals. For fluids HFDR type (phosphate esters) use FPM seals (code V). For the use of other kinds of fluid such as HFA, HFB, HFC, please consult our technical department. Using fluids at temperatures higher than 80 °C causes a faster degradation of the fluid and of the seals characteristics. The fluid must be preserved in its physical and chemical characteristics.
