TELETEK ELECTRONICS JSC IS A HIGH-TECH MANUFACTURER OF A FULL RANGE OF INTRUDER AND FIRE ALARM SYSTEMS

Already 29 years, we continue to search, develop and realize high performance products and solutions, combining our profound technological experience, strong production capacity, and the energy and passion of our people.

The heart of Teletek Electronics' success is its productive flexibility that is expressed not only in the wide production range but also in the ability to design and make specific and exclusive versions of the product in collaboration with the Customer. This important plus brings about obvious advantages, especially in the area of intruder and fire alarm systems where the elaboration process of a customized product is sometimes very hard.

Our company works with 2 hi-tech SMD lines consisting of DEK Ela screen, PHILIPS Topaz-X Pick and Place machines and ERSA Hotflow5 oven. With capability of placing over 30 000 components per hour, the pick-and-place machines enable our high skilled and motivated engineers to mount fine pitch components, BGA components and micro BGA components as well as Double-sided Reflow Soldering.

As recognition for its high quality and reliable production Teletek Electronics is awarded with ISO 9001:2015 Certificate.

What we have achieved for 29 years:

- Continuous innovation;
- More than 130 employees;
- Export in 75 countries;
- More than 30 million manufactured products;
- Almost a million buildings, secured by Teletek Electronics' systems.

We look forward to work, grow, explore and enjoy the next coming years!

IRIS PRO

IRIS ADDRESSABLE PANELS

• Up to 4 loops with up to 250 devices per loop

• Works with Teletek Electronics and System Sensor communication protocols

IRIS and IRIS PRO are addressable fire alarm panels with 1 to 4 loops and maximum coverage of 96 zones. Up to 250 devices can be connected to every system loop. The information for the system status is visualized on sensitive graphic display and LED indication for zones and troubles. With special "2 Steps of alarm level" working algorithm the false alarms are effectively minimized. The panels have a comprehensive day/night mode facility. The panels support two communication protocols: Teletek Electronics (IRIS TTE loop) and System Sensor (IRIS SS loop) according to the type of the used devices. Up to 64 IRIS/IRIS PRO panels can be connected in Ethernet or RS485 redundant network. The panels support operation with Observer monitoring software for IRIS panels connected in a network is available. Direct programming with ProsTE software.

Technical Specifications

Main Power Supply	230VAC +10%/-15%
Frequency	
Electrical output	
Internal resistance of the batter	
Operating temperature	5°C to +40°C
Weight (without battery)	6kg
-	

Functional Features

Loops:	1 to 4
Devices per loop:	250 (TTE loop); 198 (SS loop)
Zones:	96
Back-up battery:	1, 12V/18Ah
Outputs:	4, monitored, relay type
Outputs (non-monitored, programmable, relay type):	4, 15A@24VDC
Programmable inputs/outputs:	Up to 250
Memory LOG:	10 000 events
Panels in Ethernet network (built-in TCP/IP):	Up to 64
Panels in RS485 redundant network (optional module):	Up to 64
Thermal printer:	Optional
Display:	320/240 touch screen

IRIS PRO ADDRESSABLE PANEL

Compact design in a metal box suitable for arranging of modular structures

Easy installation and maintenance

Specially designed box for building of modular structures when optional thermal printer and extra power supply are a must for the site installation. The boxes are easily mounted to each hiding all power and connection cables inside. The connected printer provides quick and easy printing to the panel's events log. The extra power unit accommodates additional back-up power for longer operation when the mains failures.

IRIS Printer

- Thermal printer in a metal box
- Suitable for modular structure
- Power supply 100-240VAC, 1.5A
- Serial interface RS-232C to IRIS PRO
- Paper width 80mm, valid print width 72mm
- Print speed max. 170mm/sec
- Self test and status indication
- Colour grey
- Dimensions 430x330x117mm

IRIS PS72

- Back-up power supply unit
- Suitable for modular structure with IRIS PRO
- Power supply 100-240VAC, 1.5A
- Place for 2 accumulator batteries 12V/18Ah
- (max. size of a battery 167x181x76mm) • Colour - grey
- Dimensions 430x330x117mm
- Certified to EN54-4

IRIS TTE Loop

- Loop Expander for 1 loop
- TTE protocol
- Supports SensolRIS devices
- Max. consumption of the loop devices 0.5A
- Max. number of devices in the loop 250

IRIS SS Loop

- Loop Expander for 1 loop
- System Sensor protocol
- Supports System Sensor devices
- Max. consumption of the loop devices 0.5A
- Max. number of devices in the loop -
- 198 (99 detectors + 99 devices)

IRIS/SIMPO Redundant module

- RS485 Network module
- The maximum length between two modules is 1000m

SIMPO ADDRESSABLE PANEL

• Up to 2 loops with up to 250 devices per loop

Entry level solution for smaller addressable installations

SIMPO is the perfect solution for your cost effective installations. It supports operation with up to two loops with coverage of 48 zones. 250 devices with Teletek Electronics protocol (SIMPO TTE Loop) could be connected to each loop. System status is visualized via LCD display and LED indication. Up to 64 SIMPO panels can be connected in RS485 redundant network or Ethernet network. Direct programming with ProsTE software is available. The panel comes in a metal casing with a multilingual LCD display and front foil for easier customizing.

Technical Specifications

Main Power Supply	90 ÷ 264VAC
Frequency	47 ÷ 440Hz
Electrical output	4.2A
Internal resistance of the battery.	<0.3 Ohm
Operating temperature	5°C to +40°C
Weight (without battery)	4.2kg

REPEATER IRIS/SIMPO REPEATER PANE

The Repeater panel is designed to work with Teletek Electronics' addressable fire alarm panels IRIS, IRIS PRO and SIMPO. It is used to display the events of the connected to the network addressable panels. The connection between the Repeater panel and addressable panels IRIS, IRIS PRO and/or SIMPO is via redundant network module. The maximum number of fire alarm panels in a network is 64. The maximum distance between two panels is up to 1000m. The information for events is visualized on LCD display and with LED indication for the system status. The Repeater panel has a built-in real time clock. Available micro USB for latest software and firmware updates.

Protocol type:	TTE
Panels in RS485 redundant network:	Up to 64
Network type:	Ring or line topology
Connection wires:	0.5-2.5mm ²
Max. length between two panels:	1000m
Memory LOG:	10 000 events
Display:	4*40 symbols
Multi language support of the software:	Yes
Color:	Grey, White

* The panel complies with the following standards:

EN54-2 - in case the repeater panel is connected to IRIS or SIMPO addressable panels in a redundant network

EN54-4 - in case the repeater panel is powered on with external power supply unit, which covers this standard

EN54 - 2/4*

MAG2/4/8 CONVENTIONAL PANELS

MAG2, MAG4 and MAG8 are conventional fire detection and indication panels certificated by EN54-2/4. MAG2 maintains 2 fixed zones with fire detectors and call points; MAG4 maintains 4 fixed zones and MAG8 - 8 fixed zones.

The MAG2, MAG4 and MAG8 panels have small size, handy cabinet, internal self-testing for technical faults.

Easy for installation and maintenance, user-friendly and simple operation - that makes the MAG fire panels suitable for home, small and middle office applications.

MAG8PLUS CONVENTIONAL PANEL

Supports up to 32 detectors and call points per zone

MAG8Plus is a conventional fire detection and indication panel certificated by EN54-2/4. The panel maintains from 8 to 16 zones with fire detectors and call points. MAG8Plus is based on a modular principle - a power unit, a control panel, zone/sounder expanders, an indication module and battery space. A detailed LED indication shows the status of the system, divided into two groups - for technician level and for monitor and observer level.

The MAG8Plus is suitable for vast range of applications - big office buildings, schools, supermarkets, etc.

Zones:	8, expandable to 16

- Simple programming by means of jumpers

Technical Specifications

FAMC

Main Power Supply	230VAC ±10%
Current consumption (mains failure)	260mA*
Auxiliary output	24VDC/0.3A fuse
Operating temperature	
Weight (without battery)	4kg
Dimensions of metal bottom	441x331x80mm
Dimensions of plastic cover	461x344x45mm
* with connected 4 zone expander modules	

ML • LOG module for recording and viewing of events

- Compatible with MAG8 and MAG8Plus*
- Memory for 8190 events
- Operation keypad with 4 buttons
- LCD display with backlight
- Multi language menus

* Built-in installation in MAG8Plus fire alarm panel. For installation with MAG8 fire alarm panel, the module is mounted into compact small plastic box SB-U with transparent cover. The SB-U box is sold separate.

MS₄

• 4 sounder outputs expander module

EN54 - 2/4

Compatible with MAG8Plus

18

MR 8

- 8 relay expander module
- Compatible with MAG8 and MAG8Plus

🗐 Fax:•۲۱ – ۴۴۹۹۴۶۴۲

1A/12V or 0.5A/24V

ME₄

- 4 zone expander module
- Compatible with MAG8Plus

IVY EXTINGUISHING PANEL

• Conventional Fire Extinguishing Panel

2 zones for extinguishing and 1 conventional fire alarm zone

IVY is a conventional fire extinguishing control panel certificated by EN54-2/4 and EN12094-1 standards. The panel is designed for using together with systems for gas, powder, aerosol, water and other types of active extinguishing.

FAMC

هاييرصنع

IVY has 3 hardwired zones - 2 for activation of automatic fire detectors and 1 conventional fire zone. Automatic and manual operation modes (selectable via 3 positional key lock) allow the operators to choose the extinguishing process control. The extinguishing process can be activated also manually with a special button on the front panel.

The IVY conventional panel is designed for extinguishing in one zone and can operate with solenoids, pressostats and other kind of actuators. Optional LOG module for reviewing of recorded memory events (up to 1000 events) can be included in the system configuration.

Technical Specifications

Main Power Supply	110-230VAC ±10%
Frequency	47-60Hz
Electrical output	26VDC; 1.5A
Consumption	
Internal resistance of the battery	
Operating temperature	5°C to +40°C
Weight (without batteries)	~3.2kg
Dimensions	

Functional Features	
Zones:	3 (2 for extinguishing + 1 conventional fire alarm)
Devices per zone:	32
Back-up battery:	2, 12V/7Ah (serial connection)
Sounder outputs: (monitored, potential)	2, 0.3A each
Extinguishing output: (monitored, potential)	1A@5min/3A@20ms
Inputs: (monitored)	6
Inputs: (non-monitored, relay)	3
Inputs, OC type: (non-monitored)	4
Display:	2-digit, 7-segment, LED
Multi language support:	Yes
Standard:	EN12094-1; EN54 - 2/4

IVY ML

- Optional LOG memory module for IVY panel
- Built-in mounting into the panel's box
- Memory for 1000 events
- Operation keypad with 4 buttons
- LCD display with backlight
- Multi language menus

SensoMAG MRB50

- Manual Release Button
- For activation of the extinguishing

EN12094-1, EN54 - 2/4

- Protective transparent cover
- Resettable flexible element
- Color yellow

SensoMAG MHB50

- Emergency Stop Button
- For emergency stop of the gas
- extinguishing system
- Protective transparent cover
- Color blue

SENSOMAG CONVENTIONAL DE

SensoMAG F10

- Fixed heat detector
- Detects temperatures over 60°C, class A2/S (SensoMAG F10A)
- Detects temperatures over 75°C, class B/S (SensoMAG F10B)
- Digital processing algorithm
- Low profile design
- LED indication with 360° visibility
- Sensor status indication on every 8 seconds

SensoMAG R20

- Rate-of-rise heat detector
- Detects temperatures above 58°C or rapid change in temperature for a period
- of time, class A1/R • Digital processing algorithm
- Low profile design
- LED indication with 360° visibility
- Sensor status indication on every 8 seconds

SensoMAG S30

- Optical-smoke detector
- Auto compensation
- Digital processing algorithm
- Low profile design
- LED indication with 360° visibility
- Sensor status indication on every 8 seconds
- Rubber gasket ring for increased protection of the smoke chamber

20

SensoMAG M40

- Combined detector (Optical-smoke and Rate-of-rise), class A1/R
- Auto compensation
- Digital processing algorithm
- LED indication with 360° visibility
 Sensor status indication on every 8 seconds
- Rubber gasket ring for increased protection of the smoke chamber

SENSOMAG CONVENTIONAL FIRE BASES

SensoMAG B24

- Standard 24V base for SensoMAG detectors
- Compatible with fire panels with alarm state current up to 15mA

FAMC

هاييرصنع

SensoMAG B24D

- Standard 24V base with Schottky diode for SensoMAG detectors
- Detects removal of detector from base
- Compatible with fire panels with alarm state current up to 15mA

SensoMAG B24RD

- Standard 24V base with Schottky diode and increased alarm state current for SensoMAG detectors
- Detects removal of detector from base
- Compatible with fire panels with alarm state current from 45mA and higher

SensoMAG B12L/U

- Relay 12V base
- For application in intruder alarm system
- Latched/Unlatched mode

DeepBase W

- Deep base accessory
- Color white (RAL 9016)
- Application for mounting on rough surfaces, pipelines, floating ceilings, etc
- Compatible with SensoMAG detectors, SensolRIS detectors, SensolRIS WSxx and BSxx sounders, SF100 WSST sounder

ACCESSORIES

FRL - 1

- Remote 24V fire indicator
- Repeats the status of 1 or several fire detectors (up to 3 SensoMAG or SensoIRIS detectors)

FAMC

- 1 input
- Complies with EN54-23

DeepBase W

- Deep base accessory
 Color white (DAL 2014)
- Color white (RAL 9016)
 Application for mounting on pouch surface
- Application for mounting on rough surfaces, pipelines, floating ceilings, etc
 Compatible with SensoMAG detectors, SensoIRIS detectors, SensoIRIS WSxx abd BSxx sounders, SF100 WSST sounder

DeepBase R

- Deep base accessory
- Color red (RAL 3020)
- Application for mounting on rough surfaces, pipelines, floating ceilings, etc
- Compatible with SensolRIS WSxx sounders, SF100 RSST/RSND sounders

Fireray One

- Reflective smoke beam detector
- Auto-alignment protocol
- Operating voltage: 14 36VDC
- Operating current: 5mA
- Low current consumption
 Signal output Individual Alarm and Fault n
- Signal output: Individual Alarm and Fault relays (VFCO) 2A @ 30 VDC
- Operating distance: 5 -120m (for 5-50m one reflector is required; for 50-120m 4 reflectors are required)
- Suitable for installation into large and small places
- IP55
- Certified to EN54-12

FLM Kit

- Kit for flush mounting
- For use on 25 mm thick dry wall
- Includes: 2 hangers, mounting screws
- Compatible with IRIS and MAG8Plus

PS2410

- Power supply unit
- 24 VDC/1Å
- Metal box
- Transformer
- Complies with EN54-4

SB-U

- Universal small plastic box
- For application with ML log memory module in installation with MAG8 fire alarm panel
- Transparent cover for easy visual inspection

Proste is a software package for programming of Teletek Electronics intruder and fire alarm panels. The software allows fast and user-friendly programming.

System	Day/Night		
. Panel SIMPO . General Settings	Day/Night Schedule	Sunday	Activate 00:00 Deactivate 00:00
1. Access Codes 2. Day/Night 3. Panel Settings		Monday	Activate 00:00 Deactivate 00:00
4. Delay (T1) 5. Sounders Mode		Tuesday	Activate 00:00 Deactivate 00:00
 6. Company Logo 2. Panel Outputs 3. Zones 		Wednesday	Activate 00:00 Deactivate 00:00
Gamma A. Network Gamma S. Loop Devices		Thursday	Activate 00:00 Deactivate 00:00
 ➡ 1. Loop1 ➡ 5. Loop2 		Friday	Activate 00:00 Desctivate 00:00
		Saturday	Activate 00:00 Deactivate 00:00
	Day Mode	OFF	

ProsTE Advantages

- Intuitive and user friendly graphic interface
- Easy programming of all system parameters
- Saves time and effort
- Allows creation of default configurations in TDF (Teletek data files) ready for use on site
- Decreases possibility for mistakes during programming
- No need to remember addresses or use programming manuals
- Download and update available at www.teletek-electronics.com
- Multi language support
- Help wizard

Supported products

- Eclipse 8/16/32/99
- BRAVO Wireless panel
- IRIS
- SIMPO
- IRIS/SIMPO Repeater
- ARGUS
- TTE GPRS Standard
- TTE GPRS Simple
- TTE LAN
- TTE Combo
- TP2000 (ver. 8.xx)

OBSERVER MONITORING SOFTWARE

Observer is a software application for monitoring of sites equipped with burglary or fire alarm panels produced by Teletek Electronics JSC.

Functional Specifications

• Supported panels for operation: ECLIPSE Series, IRIS Series, SIMPO, BRAVO • Supports up to 64 panels ECLIPSE, BRAVO, IRIS and SIMPO - up to 1000 devices per IRIS panels, up to 500 devices per SIMPO panel, up to 30 devices per ECLIPSE panel (depends on the panel's model), up to 16 devices per BRAVO panel

 Monitors the condition and state of SensoIRIS fire detectors (Alarm, Normal, Fault) and Area(s) in ECLIPSE/BRAVO panels

- Shows full information about the fire detector in alarm state zone, name, etc
- Monitors faults in the panel Low Batt, AC Loss, etc
- Allows control over the Fire alarm panel silence buzzer, silence sounders, evacuation, reset
- Allows control over the ECLIPSE/BRAVO alarm panel Arming /Full, Stay,
- Sleep/, Disarming, Zone Bypass, PGM outputs switch ON/OFF
- Allows import of architectural plans and pictures on which the detectors are placed (JPG, BMP, PNG, TIF, GIF)

🚺 Tel:୦۲۱– ۴ ۸ ୦ ୦ ୦ ۴ ۹

🕞 Fax :• ۲۱ – ۴۴۹۹۴۶۴۲

- Keeps printable event log
- Signals visually and audibly in case of alarm or fault
- ModBus protocol included
