تهران، کیلومتر ۲۱ بزرگراه لشکری (جاده مخصوص کرج)

روبروی پالایشگاه نفت پارس، پلاک ۱۲

With fifty years of experience, Gefran is the world's leading designer and producer of solutions for **measuring, controlling, and driving industrial production processes**.

We have branches in 14 countries and a network of over 80 worldwide distributors.

## QUALITY AND TECHNOLOGY

Gefran components are a **concentration of technology**, the result of constant research and of **cooperation with major research centers**.

This makes Gefran synonymous with quality and expertise in the design and production of:

- **sensors** for measuring main variables such as **temperature, pressure, position and force**
- **state-of-the-art components and solutions for indication and control**, satisfying demands for optimization of processes and intelligent management of energy consumption
- **automation platforms** of various complexities
- **electronic drives and electric motors** in AC and DC for all industrial automation, HVAC, water treatment and lift needs.

**Gefran's know-how and experience guarantee continuity and tangible solutions.**

## SERVICES

A team of Gefran experts works with each customer to select the ideal product for its application and to help install and configure devices ([technohelp@gefran.com](mailto:technohelp@gefran.com)).

Gefran offers a wide range of courses at different levels for the technical-commercial study of its product as well as specific courses *on demand*.

HOME LIFT

LOW RISE

MEDIUM RISE

HIGH RISE

## LIFT CONTROL SYSTEMS

Modernizations of existing systems, new systems with and without machine room, applications with synchronous and asynchronous motors with and without gearbox, can be tackled in a targeted and simple way with Gefran drives

Flexible and complete thanks to a wide range of options and dedicated accessories, the inverters of the SIEIDrive - LIFT series are the fast, immediate solution for all application requirements.

The thousands of systems operating all over the world are the best evidence of Gefran's skill and the absolute quality of the product.

In addition to foreseeing the market's application needs, Gefran forms partnerships with its customers to find **the best way to optimise and boost the performance of various applications.**

## ICS-ADL300 • DESCRIPTION

### THE INTEGRATED SOLUTION FOR ELEVATORS

ICS (Integrated Control System) is the new elevator platform developed by Gefran, in which the control card is integrated into the inverter and communication takes place via a dedicated internal interface, which guarantees complete interoperability and very fast response times.

#### “ LIFT Controller inside ”

The system also incorporates the typical car functions, thanks to two specific external cards: car roof card and operator card, connected to the control unit by dedicated fieldbuses.

#### “ Lower costs with Plug & Play logic ”

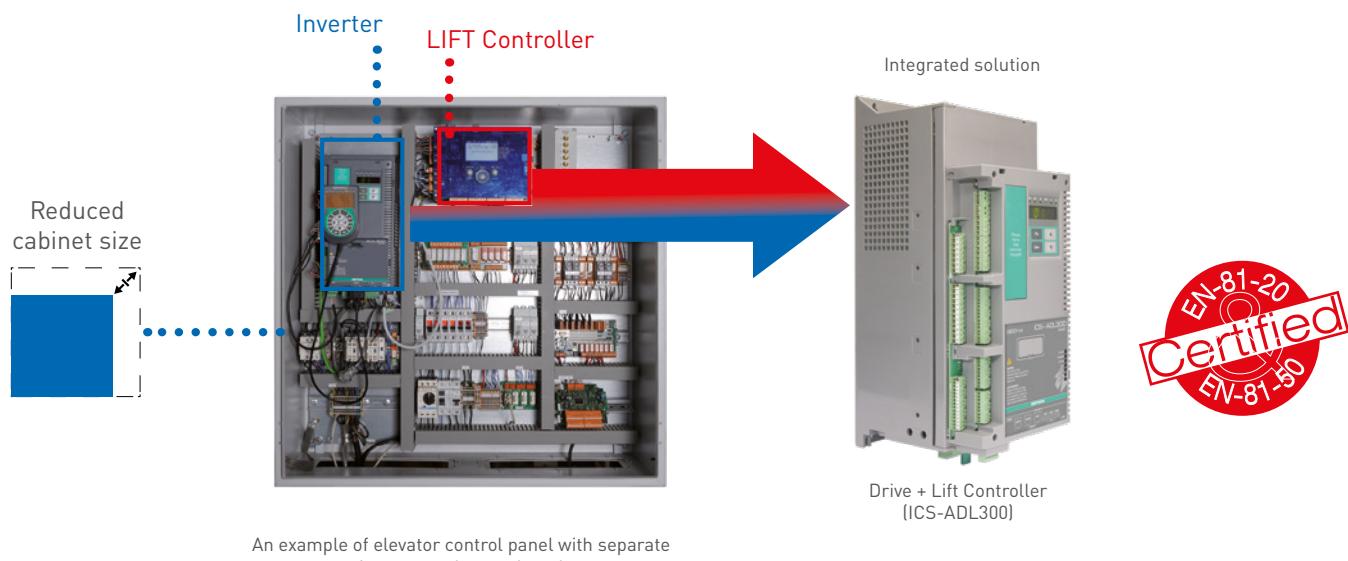

Unlike traditional systems, in which the inverter and control card are separate units which require dedicated wiring and programming, the integrated solution reduces design, installation and maintenance costs, thanks to Plug & Play logic.

#### “ One programming environment for drive and control card ”

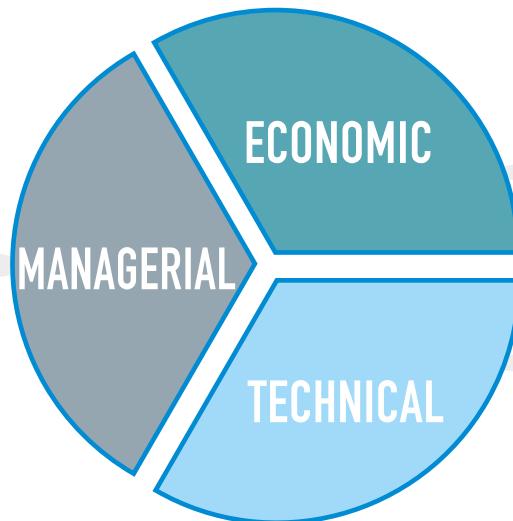

A single configuration environment structured into thematic menus allows the fast and user-friendly programming of the inverter and the control card. The possibility to configure various user profiles (installer, maintenance personnel, expert programmer), each with specific credentials, limits access to a limited subset of menus. Cutting-edge software with all of the advanced functions required by modern systems, allows the proposal of the product for a wide range of applications, such as High Rise, Medium Rise and Low Rise, both at high and low speed, with different traffic profiles. Applicable to freight and passenger elevators, with control panel in a room-less machine configuration (RLM).

#### “ The first Certificated Contactorless Integrated Lift ”

The complete system is the ideal solution for manufacturers who work solely with Gefran for both the inverter and the control system, and especially for those who want to propose cost-effective and innovative solutions for modernizations and new installations.

## ADVANTAGES OF AN INTEGRATED SOLUTION

### SINGLE INTERFACE FOR:

- Customer Service
- Handling Orders
- Delivery Times

### SIMPLIFIED INSTALLATION AND MAINTENANCE:

- Less wiring time
- Smaller cabinet
- Rapid and easy configuration
- Less maintenance time
- Less system complexity
- Less troubleshooting time

### HIGH PERFORMANCE

- Direct landing.
- 200% overload for 10 sec.
- Integrated braking unit up to 55kW.
- Position control.

### PREMIUM FUNCTIONALITY:

- High performance
- Comfort
- Safety
- Quality
- Specific certifications
- CONTACTORLESS operation

### SAFETY

- UCM\* according to 5.6.7.3 of EN 81-20:2014 and 5.8 of EN 81-50:2014 ( 9.11.3 and F.8 of EN 81-1:1998+A3:2009).
- Safety Torque Off (STO) EN61800-5-2-2007 SIL3 certification.
- Integrated safety.
- cULus (UL508C)

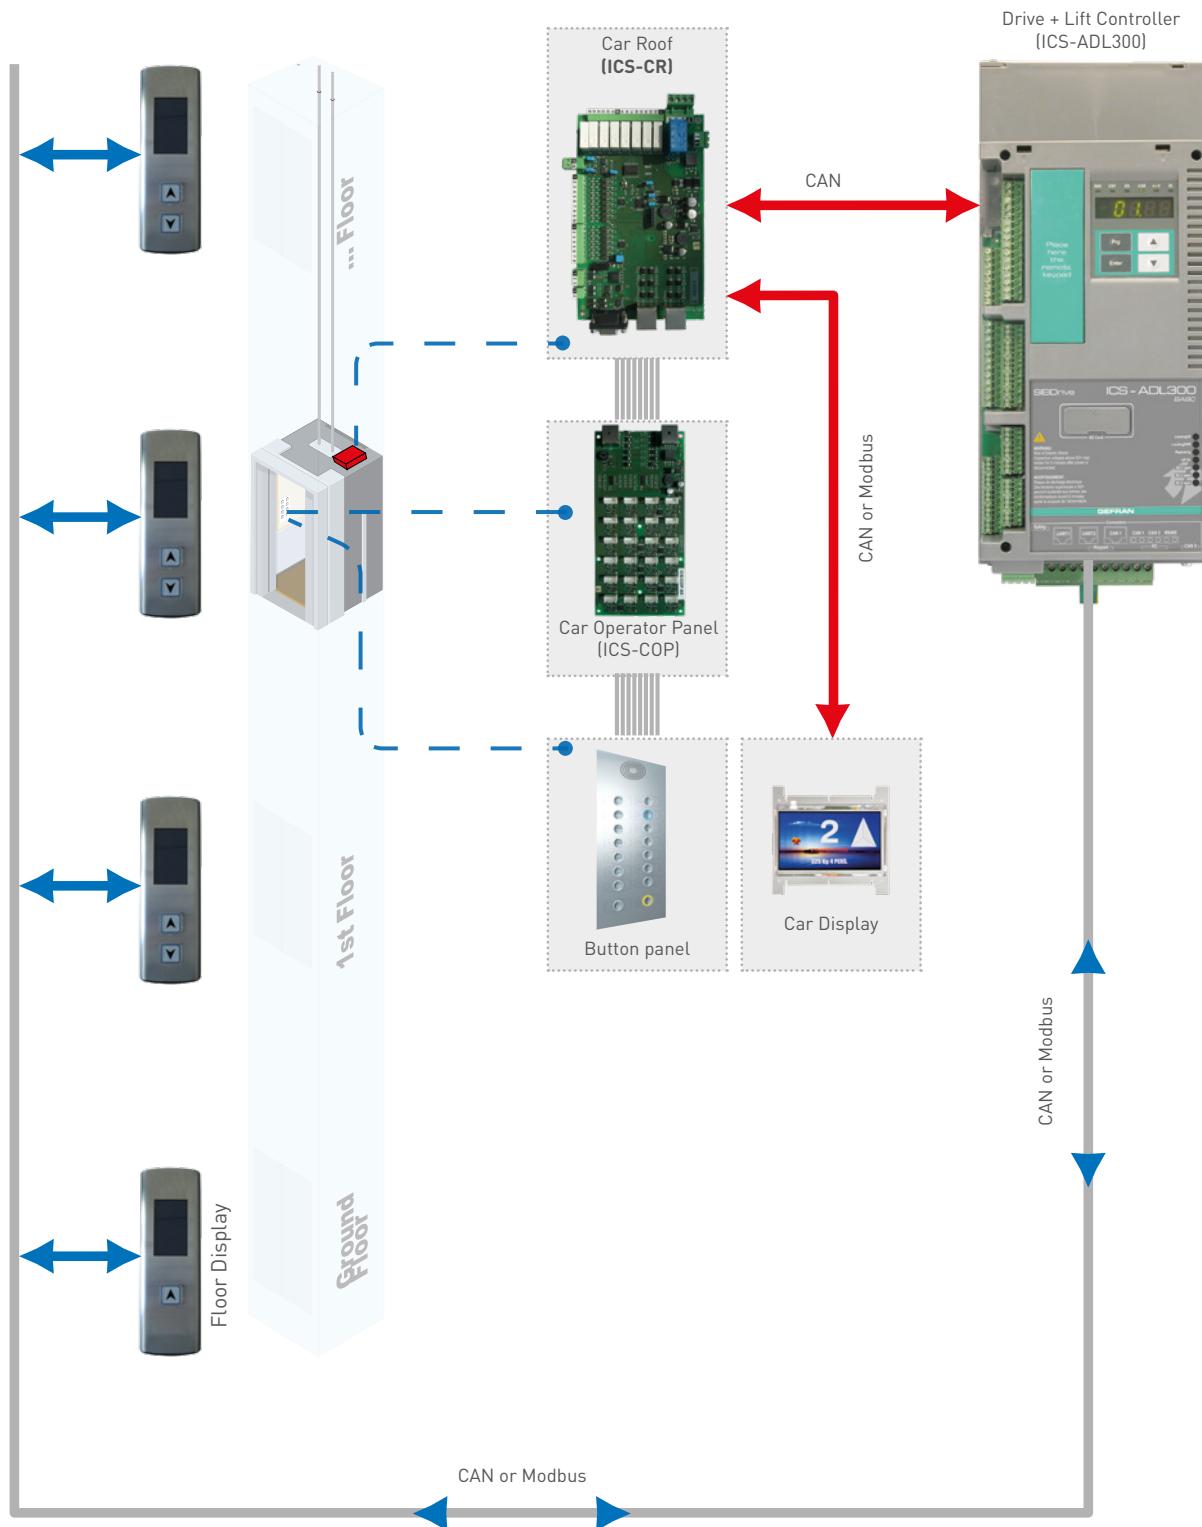

### COMFORT

- Floor alignment with less than 2 mm tolerance
- No vibrations.
- Anti-rollback.
- Contactorless.

\* Unintended car movement

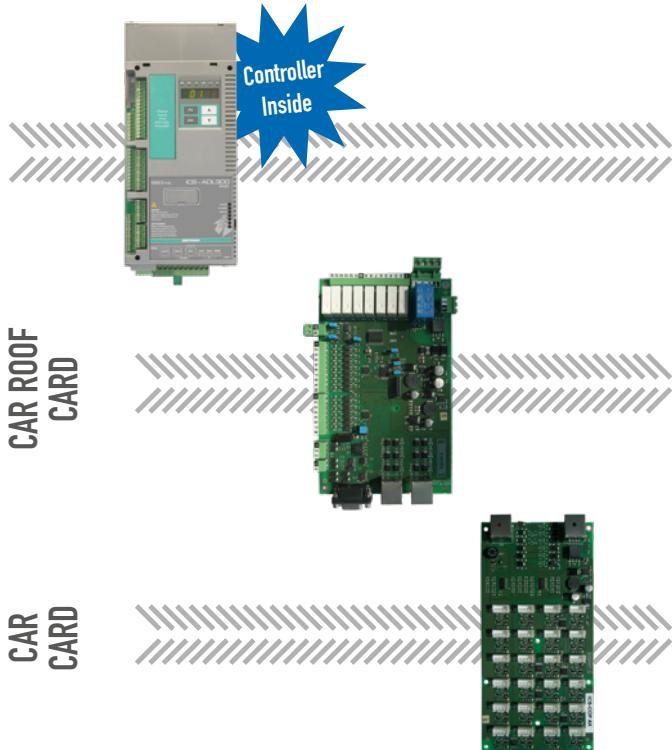

## ICS SYSTEM ARCHITECTURE

- Complete control system for passenger and freight elevators
- Perfect for Low Rise, Medium Rise and High Rise systems
- Plug & Play installation of system parts
- The first integrated lift capable of using displays with Modbus communication on serial RS485 and with CAN communication.

## SYSTEM COMPONENTS

### ICS-ADL300 + CARDS

#### ICS-ADL300 BASIC

- Built-in I/Os and Feedback card (Absolute Sincos + Digital Incremental or EnDat + SSI).
- Integrated Control card (Inside).
- Power Range 4kW – 75 kW 3ph version.
- Power Range 1.5kW – 5.5kW 1ph version.

#### CAR ROOF PANEL (ICS-CR)

- The ICS-CR card manages the complete operation of the car and sends all the information to the controller via a dedicated CAN bus communication.
- It manages the operation of car doors, ventilation and lighting, as well as the load sensor.

#### CAR OPERATOR PANEL (ICS-COP)

- Interface card between button panels and Car Roof Card (ICS-CR).
- Collects commands received by car and transfers them to the car roof card and then to the control card.

### OPTIONS

#### CAR DISPLAY

#### FLOOR DISPLAY (SIMPLEX)

#### RS485

+24V
RS485 A
RS485 B
+24V

#### CAN

CAN L
CAN SHLD
CAN H

#### WE THINK «OPEN» TO MEET THE NEEDS OF THE MARKETPLACE

Gefran supplies the ICS solution with **floor** and **car display** with either an **RS485 interface** or a **CAN interface**.

«OPEN» solutions are possible with the **display** (RS485 or CAN) supplied by third parties.

#### CAR DISPLAY (ICS-CD)

- 7 inch car TFT display.
- Communication with ICS-CPU control system via dedicated CAN channel (CAN 1) or RS485.
- UNI EN 81-70.
- Button panel and buttons (optional).

#### SIMPLEX FLOOR DISPLAY (ICS-FD)

- 2.8 inch floor display.
- Double figure in segments.
- Communication with ICS-CPU control system via dedicated CAN channel (CAN 2) or RS485.
- Indication of direction and signals.
- UNI EN 81-70.
- Button panel and buttons (optional).

## MAIN FUNCTIONS

- > **Maintenance and Inspection mode:** during maintenance and inspection, the operator can run the car at a controlled speed by using the button panel in the control panel or on the car roof.
- > **Independent Run mode:** when this automatic mode is selected, the elevator closes the doors automatically and ignores all of the calls coming from outside, for a non-stop run to the destination floor.
- > **Operator mode:** the elevator excludes automatic mode and works in the presence of an operator who controls all operations. During car movement, the operator can ignore all of the calls coming from outside or accept them selectively, controlling the car's direction and opening of the doors.
- > **Return to floor in case of fire:** when the system receives the fire signal, the elevator ignores all floor calls and keeps the doors closed until the car reaches the evacuation floor.
- > **Firefighter control:** when fire mode is active, automatic operation of the doors is disabled and opening is controlled manually from inside the car, which can happen only when the car has reached the landing floor.
- > **Automatic return to floor:** if no calls from inside the car or from the floors are not received after a certain (programmable) time, the car is returned to the landing floor.
- > **Return to floor at night:** during the night, every time the elevator completes a run it always returns to the selected floor.
- > **Deceleration at floor:** when the doors open, the cables can be subject to considerable elastic deformation due to the entrance/exit of people or goods into/from the car. When the doors are open, the system realigns the car to the floor with millimetric precision.
- > **Overload:** if the car is loaded with a weight exceeding its nominal capacity, the elevator goes into overload condition. A buzzer and a signal light indicate overload status and prevent closing of the doors.
- > **Earthquake:** in case of earthquake, the system receives a signal from the earthquake sensors that takes the car to the nearest floor, opens the doors, and puts the car in stop status.

> **Anti-vandalism:** based on the number of people in the car, the system determines the maximum allowed number of requests. If this number exceeds the set limit, the system considers it an improper use and cancels all calls. The passengers then have to re-select their destinations.

> **Full collective:** calls from floors are recorded with the car available or not available. Calls from floors and requests in car are executed in logical order based on the direction of the car. Two call buttons on each intermediate floor are required: one up and one down (only one button at the top and bottom floors).

> **Down (up) collective:** calls from floors are recorded by pushing the single button on each floor. If the car is free or going down (up), it responds to calls from the highest (lowest) floor, then to the others, during its downward run toward the main floor. Calls in the car are recorded instantaneously and executed in logical order based on the direction of the car.

> **Call management with full car:** when the car runs with a full load, the system ignores floor calls. These calls are stored and served during the next run (Simplex systems) or by the other car (Duplex systems).

> **Double stop management:** once the selected destination floor is reached, the elevator can manage independent opening of the two car doors based on the recorded call (for example, there may be two separate offices or services on the same floor).

> **Time management:** the elevator can exclude a specific floor or a specific stop in a programmable time band (for example, use of the swimming pool in a hotel is blocked from midnight to 6 AM).

> **Energy efficiency:** the system can switch off the lights and air conditioning if it receives no calls for a certain time.

## SYSTEM CHARACTERISTICS

	ICS-ADL300
<b>Applications</b>	<ul style="list-style-type: none"> <li>• Passengers &amp; freight elevators</li> <li>• High Rise Buildings &amp; Home Lift</li> <li>• Gearless &amp; Geared motors</li> <li>• For machine room &amp; and Room-less (MRL) systems</li> <li>• New installations &amp; modernizations</li> </ul>
<b>Number of elevators</b>	Simplex - Duplex - Group (up to 8)
<b>Number of stops</b>	Up to 64
<b>Number of floors</b>	Up to 64
<b>Speed range</b>	Up to 3 m/s
<b>Car door operation</b>	Up to 3 independent doors
<b>Car display/button panel</b>	Up to 2
<b>Communication &amp; Wiring system type</b>	CAN bus serial communication (shielded cables) or RS485 serial communication
<b>Call management</b>	Full Selective - Down Selective - Up Selective
<b>Stand-by Mode</b>	External +24VDC power supply
<b>Safety (EN81-1 + A3)</b>	Two Contactors - One Contactor - CONTACTORLESS
<b>Approvals</b>	CE, UL508C
<b>Commissioning with full load</b>	Motor phasing and self-learning with the motor stopped are performed automatically with a single command
<b>Express arrival</b>	The arrival at the floor follows an optimized speed curve, with no jolts
<b>Deceleration at floor</b>	The system automatically corrects the arrival at the floor before opening the doors
<b>Position of the Floor &amp; Self-learning</b>	The system automatically learns and memorises the distances and position of the floor
<b>Emergency Mode</b>	In the event of failure of the power circuit, the car automatically goes to the nearest floor

## APPLICATIONS AND GUIDE TO SELECTION

Different applications require specific products for both regenerative and traditional solutions.

The product-solution match is not binding. The following table gives a number of examples based on systems already installed.

	HIGH RISE	MID RISE	LOW RISE	HOME LIFT
Profile	<ul style="list-style-type: none"> <li>Height: 90+ m</li> <li>Floors: 30+</li> <li>Speed Range: 2.5...5 m/s</li> </ul>	<ul style="list-style-type: none"> <li>Height: 18...90 m</li> <li>Floors: 6...30</li> <li>Speed Range: 0.8...2.5 m/s</li> </ul>	<ul style="list-style-type: none"> <li>Height: 12...18 m</li> <li>Floors: 3...6</li> <li>Speed Range: 0.6 ... 0.8 m/s</li> </ul>	<ul style="list-style-type: none"> <li>Height: 4...8 m</li> <li>Floors: 1...2</li> <li>Speed Range: 0.3 ... 0.6 m/s</li> </ul>
Requirements	<ul style="list-style-type: none"> <li>High Speed</li> <li>Reliability</li> <li>Smooth Acceleration and Ride comfort</li> <li>Limited passengers' waiting and travel time</li> <li>Regenerative Solution</li> </ul>	<ul style="list-style-type: none"> <li>Cost Saving</li> <li>Space Saving</li> <li>Low Energy Consumption</li> <li>Smooth Acceleration and Ride comfort</li> <li>Regenerative Solution</li> </ul>		<ul style="list-style-type: none"> <li>Cost Saving</li> <li>Space Saving [MRL]</li> <li>Low Energy Consumption</li> <li>Easy Commissioning</li> </ul>
Specific functions	<ul style="list-style-type: none"> <li>Premium components and design</li> <li>Pre-torque and precise landing at floor</li> <li>Door pre-opening</li> <li>A FE regenerative units.</li> </ul>	<ul style="list-style-type: none"> <li>Optimized hardware solutions</li> <li>Pre-torque and precise landing at floor</li> <li>Contactor-less</li> <li>External +24VDC power supply for stand-by control</li> <li>A FE Regenerative units.</li> </ul>		<ul style="list-style-type: none"> <li>Optimized hardware solutions</li> <li>Contactor-less</li> <li>External +24VDC power supply for stand-by control</li> <li>Rapid commissioning.</li> </ul>
Rigenerative		 AFE200 + ICS-ADL300		
Non Rigenerative		 ICS-ADL300-4, ICS-ADL300-2T		 ICS-ADL300-2M
		 ICS-VDL100		

## GENERAL CHARACTERISTICS

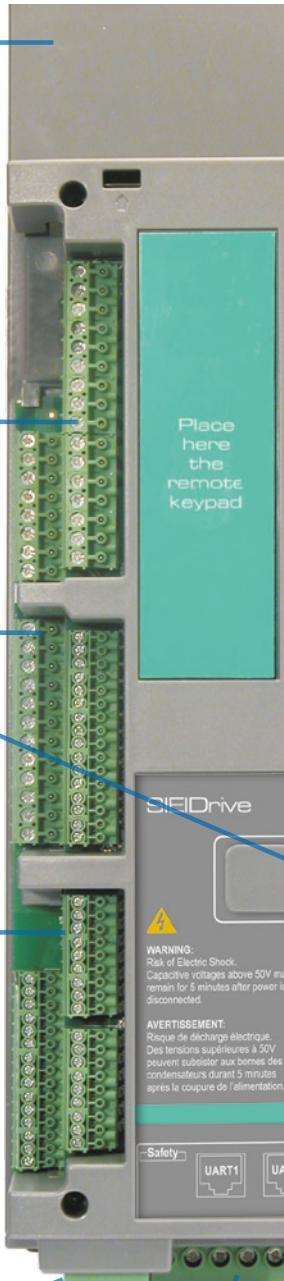

### UNIVERSAL MECHANICAL STRUCTURE

The extremely compact **ICS-ADL300** reduces the size of conventional lift systems and it is suitable for installation in roomless systems.

### I/O MANAGEMENT

**ICS-ADL300**, integrates as standard:

- n. 25 Digital Inputs NPN/PNP + 1 Digital Input (Enable);
- n. 8 Digital Outputs;
- n. 4 Analog Inputs;
- n. 6 Relay Outputs;
- n. 4 Digital Inputs «Heavy Current Detection»

### SD CARD PORT

The SD memory card makes saving and loading data and configurations with the **ICS-ADL300** very simple.

Special adapter required  
KIT KEY SD-CARD, cod. S574L.

### ENCODER MANAGEMENT

The **ICS-ADL300** interfaces with all the main feedback devices:

**ICS-ADL300**, integrates as standard:

- Input for 5 Vdc TTL incremental digital encoder (Sincos version)
- Input for absolute SinCos encoder (Sincos version)
- Input for absolute Endat / SSI encoder (-ED version)

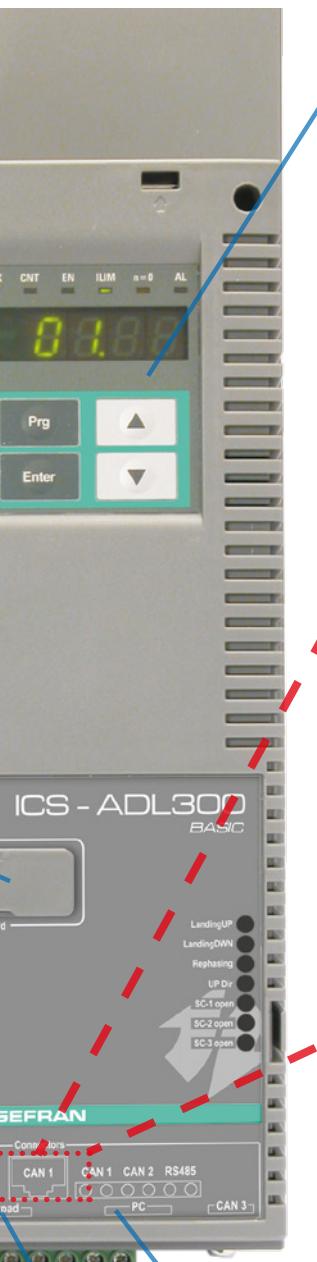

### “SAFETY” INPUTS

for use with a single output contactor or in contactorless mode.

### BACK-UP POWER SUPPLY

The **ICS-ADL300** guarantees operation even in the event of a power failure.

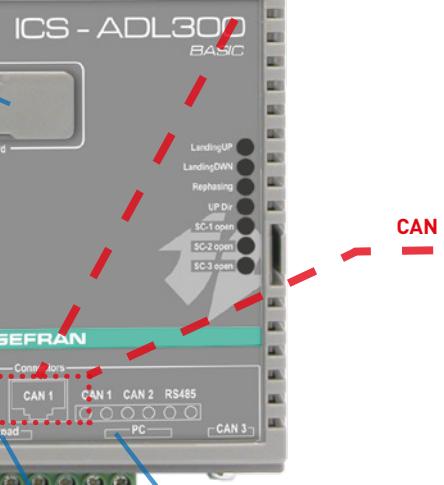

It features an automatic return-to-floor function managed by an external device such as UPS or buffer battery via a single phase 230V AC power supply (with EMS module).

### INTEGRATED KEYPAD

The integrated programming keypad allows fast programming and immediate start-up.

- 1-line x 4-character alphanumeric LED display with sign
- Simple parameter modification
- Menu and individual parameters displayed in numerical format
- Fast navigation keys
- Alarms / messages and startup wizard displayed in text format
- Resetting of alarms from keypad.

### CONFIGURATION TECHNOLOGY

For peer-to-peer programming via PC, **ICS-ADL300** integrates as standard the RS232 serial line with **Modbus RTU** protocol.

### OPTIONAL PROGRAMMING KEYPAD

The optional KB-ADL programming keypad featuring full display of parameters and variables in 5 languages makes the **ICS-ADL300** extremely intuitive and easy to use.

It has a strip of magnetic material on the back so that it can be attached to the front of the drive or other metal surface (e.g. door of the electrical panel).

The keypad can be used remotely from distances of up to 15 m. A 70 cm-long connection cable is supplied as standard.

Up to 5 sets of parameters can be saved using the KB-ADL keypad and sent to other drives.

- 5 line x 21 character display
- Alphanumeric plaintext
- Complete information regarding each parameter
- Fast navigation keys
- Key for displaying the last 10 parameters that have been changed
- DISP key for rapid display of operating parameters
- Uploading-Downloading and saving of 5 complete sets of drive parameters

## TECHNICAL CHARACTERISTICS OF THE INVERTER

MODEL	ICS-ADL300-2T	ICS-ADL300-2M	ICS-ADL300-4
<b>Control mode</b>	Field Oriented Control	Field Oriented Control	Field Oriented Control
<b>Power</b>	5.5 ... 37kW	1.1 ... 5.5kW	4 ... 75kW
<b>Voltage</b>	3 x 200-230Vac, ±10% 50/60Hz	1 x 200 Vac, ±10% 1 x 230 Vac, -15%+10% 50/60Hz	3 x 230-400-480Vac, -15%+10%, 50/60Hz
<b>Motor type</b>	Asynchronous / Synchronous	Asynchronous / Synchronous	Asynchronous / Synchronous
<b>Speed control (Accuracy)</b>	± 0.01% Motor rated speed (1)	± 0.01% Motor rated speed (1)	± 0.01% Motor rated speed (1)
<b>Overload</b>	up to 200% In * 10" (up to 11kW) up to 180% In * 10" (≥ 15kW)	up to 200% In * 3"	up to 200% In * 10" (up to 22kW) up to 180% In * 10" (≥ 30kW)
<b>Max output frequency</b>	300Hz	300Hz	300Hz
<b>EMI filter</b>	Integrated (ICS-ADL300.-F models) (EN 12015; EN 61800-3 category C2 and C3)	Optional external (EN 12015; EN 61800-3 category C2 and C3)	Integrated (ICS-ADL300.-F models) (EN 12015; EN 61800-3 category C2 and C3)
<b>Choke</b>	DC side choke: no AC side choke: external optional	no	DC side choke: integrated (sizes ≥ 4300), external optional on lower sizes AC side choke: external optional
<b>Braking unit</b>	Integrated up to 30kW with external resistor	Integrated with external resistor	Integrated up to 55kW with external resistor
<b>Port for SD card</b>		yes	
<b>Dimensions for roomless applications</b>		yes	
<b>Emergency operation</b>		Optional (UPS or buffer battery with EMS module)	
<b>Max system speed</b>	3.0 m/s	1.0 m/s	3.0 m/s
<b>Serial communication</b>		RS232 connector, used for programming (PC) and control (Modbus communication standard in all drives). RS485 connector (for optional keypad).	
<b>Protection class</b>		IP20	
<b>Immunity / Emissions</b>		In compliance with EN 12015 electromagnetic compatibility directive, using internal filter (ICS-ADL300-...-2M series with optional external filter)	
<b>Operating temperature</b>		-10...45°C (32°...113°F), +45°C...+50°C (+113 ... +122°F) with derating	
<b>Altitude</b>		Max 2000 m. (up to 1000 m without derating)	
<b>Markings</b>		CE, Complies with the EC Directive concerning low voltage equipment (Directives LVD 2014/35/EC, EMC 2014/30/EC, Lift 2014/33/EC ) cULus (UL508C)	

### WEIGHTS AND DIMENSIONS

INVERTER	Dimensions: Width x Height x Depth		Weight	
	mm	inches	kg	lbs
ICS-ADL300-1...	162 x 343 x 188	6.38 x 13.50 x 7.4	5.8	12.8
ICS-ADL300-2...	162 x 396 x 188	6.38 x 15.59 x 7.4	7.8	17.2
ICS-ADL300-3...	235 x 401 x 208.4	9.25 x 15.79 x 8.21	10.5	23.5
ICS-ADL300-4...	267.6 x 616 x 305	10.53 x 24.25 x 12.01	32	70.6
ICS-ADL300-5...	311 x 767 x 360.4	12 x 30.2 x 14.18	60	132.3

CARDS	Dimensions: Width x Height x Depth		Weight	
	mm	inches	g	oz.
Car Roof (ICS-CR)	180 x 110 x 20	7.09 x 4.33 x 0.79	200	7.05
Car Operator (ICS-COP)	130 x 80 x 20	5.12 x 3.15 x 0.79	65	2.29

DISPLAY	Dimensions: Width x Height	
	mm	inches
Car Display (ICS-CD)	154 x 86	6.1 x 3.4
Simplex Floor Display (ICS-FD)	67.5 x 70	2.65 x 2.75

## GF\_eXpress PROGRAMMING SOFTWARE

GF\_eXpress is the software tool used to configure all the drives available in the Gefran catalogue.

Product selection is immediate by mean of a drop down menu and thanks to the graphical interface the configuration is easy and intuitive.

### Configure your Drive

The configuration of the drive is organized in various contextual menus, available in 6 different languages, where the operator through a graphical layout is guided step by step in the configuration process, with clear indication of the available parameters and the range of possible values to set.

The specific menu "Lift" groups all the parameters strictly related to the elevator systems.

Divided by functional contexts, the setting of parameters about mechanical data, lift sequences, acceleration and deceleration ramps, multispeed setting, is fast and easy.

For the commissioning two modes are available: easy and expert, where the operator can select to perform a faster configuration with a limited set of parameters, or a refined configuration where the setting of more parameters is required.

The selected product can be configured using a text interface or a guided graphical interface.

To check and monitor the configuration, the integrated Oscilloscope can simultaneously monitor up to 8 curves.

The reference value for the curve being displayed can be selected from among all the variables that are available for the selected drive.

### Save time with Wizard and Still Autotune

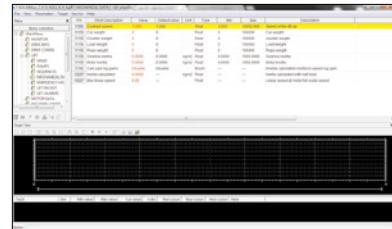

Thanks to the Wizard, the start-up of the motor is easy and fast by filling the parameters requested step by step.

The still autotune is quickly performed, avoiding operators to decouple the car from the ropes, assuring a safe working environment, and a faster commissioning.

### Export your configuration

All details for configuration of each single device are sent out in XML format to facilitate expansion of the catalogue and parameters.

The parameters can be exported and printed.

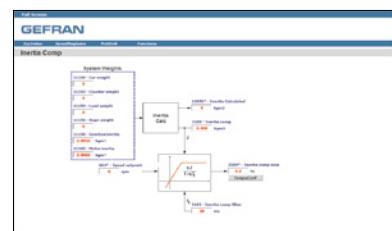

### Customize the tool

Based on different needs and context, the tool allows to create and store recipes, where the configuration can be saved with a sub-set of configured parameters.

Custom parameter menus with a limited sub-set of data can be created, to enable a better and more effective device configuration.

It's possible the management of parameter archives for multiple configurations.

GF\_eXpress is indisputably the perfect tool to allow a fast, flexible, intuitive and easy commissioning of the drive for the elevator systems.

## TECHNICAL DATA

### Operating systems:

> Windows © 2000, XP, Vista, Windows 7.

### Minimum PC requirements:

- > Pentium class CPU
- > RAM 512 MB
- > Free space of > 200 MB
- > Graphic card min. VGA (1024x768)
- > N. 1 RS232 or USB serial port
- > N. 1 Ethernet port
- > CD-ROM drive

## SOFTSCOPE: INTEGRATED SOFTWARE OSCILLOSCOPE

SoftScope is a software oscilloscope with synchronous sampling (buffered with a minimum sampling time of 1ms).

Using SoftScope the user can fast and easily display some specific variables.

To give an example: commissioning variables, variables to test performance of the systems, or variables to tune for control system optimization, can be monitored without the need of external oscilloscopes.

To understand if the approach to the floor is following the wished ramps or there is some rollback in the system, thanks to the SoftScope the analysis is faster and accurate.

It's possible to analyse the speed profile of the car showing details about actual floor approach, ramps, jerks.

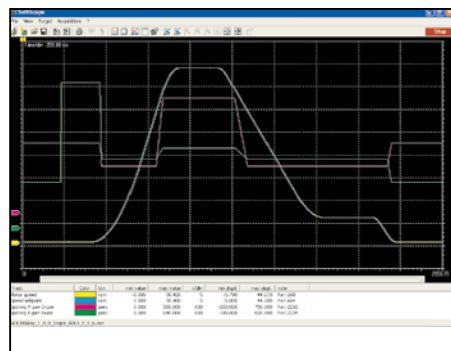

The curves can be displayed with different colours and they can be singularly enabled/disabled.

The zoom function allows enlargement of the details, while the cursor allows detection of the signal peaks and duration.

Trigger conditions (e.g. climbing leading edge of a specific signal), re-recording

quality (a multiple of the basic clock at 1ms), recording duration period are parameters that the tool allows to control.

The displayed curves can be printed and stored in ASCII format and can be used with the most common data processing tools (for example Excel, Matlab).

<b>Overload</b>										
200% * 10 sec with output frequency more than 3 Hz										
150% * 10 sec with output frequency less than 3 Hz										
<b>Maximum Switching frequency</b>		kHz				10 / 5 according to Heat-sink temperature				
<b>U<sub>2</sub> • Maximum output voltage</b>						0.98 x U <sub>LN</sub> (U <sub>LN</sub> = AC Input voltage)				
<b>f<sub>2</sub> • Maximum output frequency</b>		Hz				300				
<b>IGBT braking unit</b>							Standard internal (requires external resistor); braking torque 150% MAX		Optional External	

\* The derating factors shown in the table below are applied to the rated DC output by the user. They are not automatically implemented by the drive: Idrive = In x Kalt x Kt x Kv

(1) Kv : Derating factor for mains voltage at 460Vac and power supply from AFE200.

(2) Kt : Derating factor for ambient temperature of 50°C (1% every °C above 45°C)

(3) Kalt : Derating factor for installation at altitudes above 1000 meters a.s.l. Value to be applied = 1.2% each 100 m increase above 1000 m.

E.g.: Altitude 2000 m, Kalt = 1.2% \* 10 = 12% derating; In derated = (100 - 12) % = 88 % In

## CHOOSING THE INVERTER - OUTPUT DATA

SIZES - ICS-ADL300...-2M		1011	1015	2022	2030	3040	3055
<b>In • Rated output current</b> (fsw = default) @ ULN=230 VAC A							
		6	6.8	9.6	13	15	22
<b>Pn mot</b> (Recommended motor power, fsw = default) @ ULN=230 VAC		KW	1.1	1.5	2.2	3	4
		Hp	1.5	1.5 - 2	2 - 3	3	5
<b>Reduction factor</b>		KT (1)	0.95	0.95	0.95	0.95	0.95
		KALT (2)	1.2	1.2	1.2	1.2	1.2
			200% *3 sec with output frequency more than 3 Hz 150% * 3 sec with output frequency 0 ... 3 Hz				
<b>Overload</b>		kHz	10				
<b>U2 • Maximum output voltage</b>			0.98 x ULN (ULN = AC Input voltage)				
<b>f2 • Maximum output frequency</b>		Hz	300				
<b>IGBT braking unit</b>			Standard internal (requires external resistor); braking torque 150% MAX				

\* The derating factors shown in the table below are applied to the rated DC output by the user. They are not automatically implemented by the drive:  
 $I_{drive} = I_n \times K_{der}$

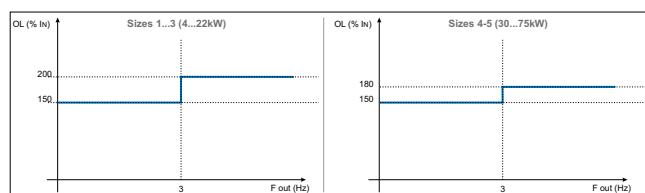

(1) KT : Derating factor for ambient temperature of 50°C (1% every °C above 45°C)

(2) Kalt : Derating factor for installation at altitudes above 1000 meters a.s.l. Value to be applied = 1.2% each 100 m increase above 1000 m.

E.g.: Altitude 2000 m, Kalt = 1.2% \* 10 = 12% derating; In derated =  $[100 - 12\%] = 88\% I_n$

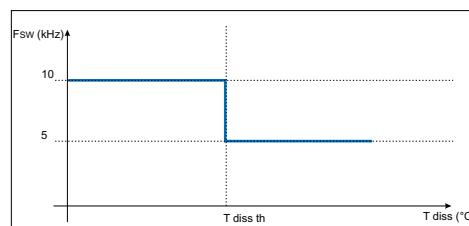

### Derating values in overload condition (ICS-ADL300...-4 / ICS-ADL300...-2T)

In overload conditions the output current depends on the output frequency, as shown in the figure below.

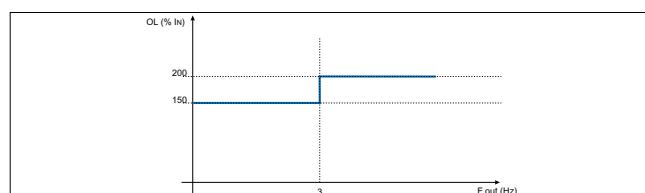

### Derating values for switching frequency

The switching frequency is modified according to the temperature of the drive (measured on the heat sink), as shown in the figure below.

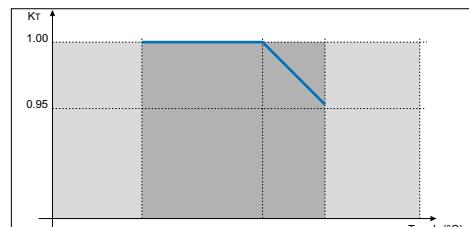

### Derating values in overload condition (ICS-ADL300...-2M)

In overload conditions the output current depends on the output frequency, as shown in the figure below.

### Ambient temperature reduction factor

Function not allowed

Range of ambient temperatures allowed

**ICS-ADL300B XXXX - KXL - F XX**

 Inverter Lift series  
ICS-ADL300B

**Mechanical dimensions of the drive:**

- 1 = size 1
- 2 = size 2
- 3 = size 3
- 4 = size 4
- 5 = size 5

**Inverter power in kW:**

- 004 = 0,4 kW
- 007 = 0,75 kW
- 015 = 1,5 kW
- 022 = 2,2 kW
- 037 = 3,7 kW
- 055 = 5,5 kW
- 075 = 7,5 kW
- 110 = 11,0 kW

**Rated voltage:**  
2M=230 Vac, 1ph  
2T=230 Vac, 3ph  
4=400 Vac, 3ph

**EMI FILTER:**  
F = included  
(empty) = not included

**Lift application:**  
L = included

**Braking unit:**  
X = not included  
B = included

**Keypad:**  
K = Integrated  
(1-line x 4-character alphanumeric LED display)

They are available on request versions with encoder Endat and versions with integrated EMI filter.

## ACCESSORIES & OPTIONS

### KEYPAD

Models		Code	Description
	<b>KB-ADL</b>	S5P2T	Programming keypad with memory
	<b>5-meter keypad cable</b>	8S8F59	5-meter keypad extension
	<b>10-meter keypad cable</b>	8S874C	10-meter keypad extension

### EXTERNAL BRAKING UNIT

Models		Code	Description
	<b>BUy 1020</b>	S9D55	Braking unit for 230Vac...480Vac lines, In= 20Arms, UL mark
	<b>BUy 1050</b>	S9D56	Braking unit for 230Vac...480Vac lines, In= 50Arms, UL mark
	<b>BUy 1085</b>	S9D57	Braking unit for 230Vac...480Vac lines, In= 85Arms, UL mark

### OTHERS

Models		Code	Description
	<b>KIT KEY SD-CARD</b>	S72644	Adapter for SD card (memory for loading data)
	<b>KIT-POWER-SHIELD</b>	S726101	Power cable shielding kit for sizes 1 and 2
	<b>KIT-POWER-SHIELD</b>	S726501	Power cable shielding kit for size 3

### DISPLAY

Models		Code	Description
	<b>ICS-FD</b>	on request	Floor Display
	<b>ICS-CD</b>	on request	Car Display

There are a wide range of displays and control panels, for information contact the Gefran Sales Department.
