The AquaCat SUPER lives up to its promise.
No matter what the situation, the cleaner can cope with it.
The unit even detects obstacles on its path and
will simply drive around them. It can be used
for all pool shapes and surfaces up to 200 m².
You can use the radio remote control for an
individual control of the AquaCat SUPER and
a systematic cleaning of polluted areas. Use
the AquaControl box to select between
the cleaning modes „Floor and walls" or
„Floor only".
A large number of additional setting
options and the short cleaning
intervals render the AquaCat SUPER
interesting also for hotel pools.
The SUPER is supplied complete with radio remote
control, transport caddy, filter fittings and filter bag
(suitable for machine washing).
The Easy Swivel system prevents a twisting of the float cable.

Your advantages at a glance:

- Also ideal for large pools
- Improved water quality
- Clean floor and wall surfaces
- Fast and effective
- Considerably reduced labour
- Customised cleaning programs
- Undisturbed privacy
- Reduced load on your filter system
- Improved recirculation of pool water
- Reduced consumption of water treatment agents
- The SUPER is almost maintenance-free
- Technical advice and service by your specialist dealer
- Technology from the market leader
- TÜV/GS tested

Aquacontrol

Cleaning level	Pool shape		
Frequency of wall climbing	Angled pool wall

AquaCat SUPER	Art. no.: 1510-671-00
Delivery includes:	Suction robot, transport trolley with cable holder
For pool surfaces:	up to 200 m²
Working voltage:	230 V AC 50-60Hz
Transformer:	DC 24 V
Power consumption:	120 W
Suction capacity:	16 m³/h
Length of float cable:	23 m
Program running time:	60 / 120 / 180 min optionally
Water temperature:	+15 °C to max. +35 °C
Max. immersion depth:	5 m
Min. immersion depth:	35 cm
Speed of run / floor:	approx. 14 m/min
Weight of unit incl. cable:	15.6 kg
TÜV/GS:	tested
Dimensions of cleaner with transport trolley:	54 x 50 x 55 cm (l x w x h)
Cleaning width:	31 cm

Convenient:

AquaControl box and radio remote control

AquaCat PRO - the powerhouse

AquaCat PRO with radio remote control, Fully automatic cleaning robot incl. transport trolley, 30 m cable,, with remote control, for pools up to 500 m²

Art. no.: 1530-860-00

| **Brief description** | The AquaCat PRO is perfectly suitable for public and private pools with a floor area of up to 500 spm. Fully automatic cleaning of floor spaces for all pool shapes. The powerful cleaning capacity of 22 m³/h removes any kind of dirt. Even bigger items, as are often found in public pools, will not stop the robust AquaCat PRO. The timer function is particularly useful. It is used to fix start of work and duration of work. Adaptation to different pool sizes is easily made via the display of the power supply.

The AquaCat PRO does not require any supervision. The delivery includes the remote control and a stable transport trolley in aluminium: large wheels even permit transport via stairs. |

| **Description** | Fully automatic cleaning robot for cleaning of swimming pools with floor areas of up to 500 m². The AquaCat PRO is suitable for cleaning floor areas in all pool shapes. The powerful cleaning capacity of 22 m³/h removes any kind of dirt. Even bigger items, as are often found in public pools, will not stop the robust AquaCat PRO. The timer function is particularly useful. It is used to fix start of work and duration of work. Adaptation to different pool sizes is easily made via the display of the power supply. To ensure an optimal adaptation to your pool, there are several options available for an easy programming via the display. Individual settings like cleaning times, switch-on delay times, cleaning level (light / regular / heavy-duty), pool length or pool lining (concrete, plastic, rough or smooth tiles) are simple and fast to program on site. The operation display provides more information about the remaining cleaning time and displays error messages.

Including corrosion-resistant, stable transport trolley made of aluminium. For storage and a proper drying of the cleaner all around. Convenient and safe transport of the AquaCat PRO to the place of use. |

Technical data

Supply voltage:	220/230 V / AC 50/60 Hz
Safety voltage (in pool):	24 V DC
Power consumption:	180 W
Suction capacity:	22 m³/h
Length of floating cable:	30 m
Running speed / floor:	approx. 17.2 m/min
Cleaning capacity designed for swimming pool surfaces:	up to 500 m²
Cleaning times, adjustable:	3, 5 or 7 hours
Delay time, adjustable:	2 or 3 hours
Cleaning level, adjustable:	light / regular / heavy-duty
Pool size (length) selectable:	15, 20 or 25 m
Pool lining selectable:	concrete, plastic, rough tiles, smooth tiles
Remote control:	standard equipment
Immersion depth:	4 m
Water temperature:	10° to 35° C
Weight of unit approx.:	13 kg
