Inputs and Outputs

We offer our customers as Victaulic and Thread Filters have 1 input and 2 outputs. 1. Exit system output 2. Exit can be used as cleaning evacuator.

Manometer Connections

Manometer There are two connection parts and 1/4 " thread manometers are connected to it, it is closed and can be opened by the user depending on the request. The opening can be done by medium speed drill and can be drilled easily in a healthy way.

Sealed Intermediate Gasket

The specially designed gasket is patented. The gasket, which sits in the junctions of the three directions, does not make any leakage. Made from special rubber material. In the case of the equivalent filters, it was very uncomfortable for the users to have problems in this area. Our gasket eliminates this problem leaks and pressure losses.

Evacuation and Cleaning

1/2" plug outlet part (Evacuation part is produced as closed and user opens as required) can be discharged by unscrewing the plug and attaching a threaded 1/2" outside diameter threaded tap.

Body and Outer Parts

The complex body and the stone Polyemid (Special Mixture engineering plastic) are produced by using raw material den and compressed with injection technology and strengthened. The high press is resistant to sunlight and external factors.
