

## HOUSED UNITS

**Overview:** Timken housed units are available in a wide variety of types and sizes to accommodate a complete range of operating conditions.

- **Sizes:** 12.7 mm - 75.4 mm shaft size (0.50 in. - 2.968 in.).
- **Markets:** Agriculture, fans and blowers, food processing and conveyors.
- **Features:** Most popular design features cast iron housing. Other material options include malleable iron, polymer, pressed-steel or rubber.
- **Benefits:** Combines bearing, housing, seal and locking system into one device for easy installation. Operates even when the shaft is not perfectly aligned with the mounting surface.

# BALL BEARINGS

## INTRODUCTION

Ball bearing housed units are available in a wide variety of types and sizes to accommodate a complete range of operating conditions.

These units generally have cast iron housings and are designed for mounting on straight shafts with a slip fit. The self-locking collar and the setscrew inner bearing designs provide ease in mounting. Bolt holes in housings take standard bolts for assembling these units to machinery frames. Several series are also available with the concentric locking collar.

Most units are made with a self-aligning feature, and it is unnecessary for the user to refine the design in excess of practical limits. Units incorporating prelubricated wide inner ring bearings may be furnished without grease fittings.

Several basic types of housed units are available: pillow blocks, flanged cartridges, flanette units, cylindrical cartridges and take-up units. The type required is determined by its application and mounting requirements. Within the basic type selected, variations allow for load factors, shaft sizes, mounting surface dimensions, base to shaft centerline heights and lubrication requirements.

### PILLOW BLOCKS

Pillow blocks, the most commonly used type of mounted units, are designed to provide shaft support where the mounting surface is parallel to the shaft axis. The bolt holes are usually slotted for adjustment during mounting.

Pillow blocks are supplied in a variety of configurations. Pressed steel and rubber pillow blocks are also available for light-duty applications.

### FLANGED CARTRIDGES

Flanged cartridges are used where a shaft passes through the machine frame at a right angle. A four-bolt mounting is the most common, however, where the mounting area is restricted, three- and two-bolt versions are available. A piloted flanged cartridge provides additional mounting accuracy and support.

Flanged cartridges are supplied in both standard and heavy-duty series. Iron and rubber flanged cartridges are also available.

A complete line of flanette units, or pressed-steel flanged cartridges, provides an economical solution to light-duty applications. Two-, three- and four-bolt mountings are available along with a relubricable version.

### CYLINDRICAL CARTRIDGES

Cylindrical cartridges, like flanged cartridges, provide shaft support where the shaft axis is perpendicular to and passing through a machined housing which is generally very thick. The outside diameter of the cylindrical cartridges permits mounting with a press fit into a straight, through-bored housing.

Cylindrical cartridges have a machined spherical bearing seat to provide initial shaft alignment in standard-duty applications. Synthetic, conductive rubber cylindrical cartridges are available for applications where low-cost, light-duty, low-noise operation is essential.

### TAKE-UP UNITS

Take-up units are used where shaft adjustment and belt tightening devices are required, such as conveyor applications. Frames for take-up units provide for either side or top mounting.

Take-up units are available in cast iron for standard-duty and pressed steel for economical, light-duty applications.

## TIMKEN SELF-LOCKING COLLAR INSTALLATION

Most Timken housed units come equipped with the self-locking collar to facilitate the mounting of wide inner ring bearings. This self-locking collar eliminates the need for locknuts, washers, shoulders, sleeves, and adapters.

The locking collar has a counterbored recess made purposely eccentric to the bore. The collar recess and the end of the bearing inner ring with which it engages are both machined so that they act as mating cams when on the shaft.

When the collar is engaged to the inner ring, it grips the shaft tightly with a positive binding action that increases with use. No adjustments of any kind are necessary.

1. Slip the shaft through the pillow block or other Timken housed unit incorporating the wide inner ring bearing. Be certain the bearing is aligned in position along the shaft to eliminate any possibility of cramping loads.

2. Fasten the unit securely to the base using the proper bolt size.

3. Place the self-locking collar on the shaft with its cam adjacent to the cam on the end of the bearing's inner ring. The eccentric recessed cam will slide over and engage the corresponding cam on the bearing inner ring. Turn the collar in the direction of shaft rotation.

4. Using a lightweight hammer and a drift pin inserted in the drift pin hole strike in the direction of shaft rotation to positively engage the collar. The wide inner ring is now locked to the shaft.

5. As a final step, fully tighten the setscrew. It exerts a wedging action to hold the collar always in the engaged position, even under shock load. This design will operate effectively after the cams are tightly locked in most cases with no setscrews at all.

## CONCENTRIC COLLAR

For simplified installation of Timken housed units equipped with concentric collar bearings, the collar is normally assembled to the wide inner ring for shipment. Slip the complete unit on the shaft following steps 1 and 2 described for the self-locking collar procedure, and tighten both setscrews.

## TIMKEN SETSCREW LOCKING BEARING

Steps 1 and 2 can be repeated from the self-locking collar installation above. To lock the setscrew bearing, simply tighten each inner ring setscrew to the suggested torque listed by shaft size. See chart below.

Shaft Size (in.)	mm	SUGGESTED	
		Torque in lbs. (n • m)	
1/2 - 11/16	17 mm	35 in lbs.	4 (n • m)
3/4 - 1	20-25 mm	80 in lbs.	9 (n • m)
1 1/16 - 1 3/4	30-45 mm	155 in lbs.	18 (n • m)
1 13/16 - 2 3/16	50-55 mm	275 in lbs.	31 (n • m)

It may be necessary to rotate the shaft to provide an easy access of the setscrew wrench to the setscrews. To disassemble, loosen the setscrews.

## BALL BEARINGS

### TIMKEN SURVIVOR™ PT SERIES

Timken's SURVIVOR™ Series housed units have been created to handle stringent food handling requirements and serve in highly corrosive applications. All assembly components have been carefully selected to comply with federal food processing requirements without compromising bearing performance needs.

The patented SURVIVOR PT polymer housed units have been tested to withstand a wide range of highly corrosive chemicals commonly found in food and beverage processing industries. These units are dimensionally stable under load and can operate in continuous temperatures up to 250° F (brief exposure up to 350° F) and the finish will not scrape or flake off during use.

The bearing inserts, given the proprietary Timken thin dense chrome coating, are combined with stainless steel locking collars to provide superior corrosion protection. This coating is a thin, dense chrome coating that will not crack or peel under known application conditions. The bearing housings are available as high-base and low-base pillow blocks, and 2-bolt and 4-bolt flanged cartridges for popular shaft sizes of 3/4 in. through 1 1/2 in. and 20 mm through 40 mm diameters. Bearing inserts are available with the self-locking collar or the setscrew locking device. The SURVIVOR PT assemblies are dimensionally interchangeable with the current line of Timken cast iron housed units.

The SURVIVOR Series provides extraordinary corrosion resistance for food and beverage industries, materials handling operations, dairy and refrigeration applications, as well as HVAC, chemical, maritime and other highly corrosive environments.

All materials used in the SURVIVOR assemblies, including the grease, are approved for USDA and FDA compliant industries.

#### ORDERING INFORMATION

To order complete SURVIVOR polymer assemblies, simply add the "PT" suffix to the current cast iron housed unit designations.

Example:

YCJT 1 PT or RAK 3/4 PT

Refer to the corresponding cast iron housing design for dimensional data. Consult your Timken sales representative or an authorized distributor for shaft size availability.

SURVIVOR inserts can be ordered using Timken's standard part number for wide inner ring bearings with a "TDCF" suffix. Example:

GY1100KRRB TDCF or G1100KRRB + COL TDCF

PT SERIES	
COMPONENT	MATERIAL
Balls	Stainless Steel
Ball Retainer	Nylon
Collar	Stainless Steel
Crush Bushing	Stainless Steel
Grease	FDA Approved
Housing	Polymer
Grease Fitting	Stainless Steel
Grease Fitting Cover	Nylon
Rings	TDC plated
Seals	Synthetic Rubber
Seal Caps	Stainless Steel
Setscrew	Stainless Steel

## TIMKEN SURVIVOR™ NT SERIES

Timken SURVIVOR NT Series is designed to stand up to the demands of the food handling industries and for use in highly corrosive applications. The NT Series provides outstanding protection in combination with thin dense chrome coating ball bearing inserts, collar and the electroless nickel-plated housing.

The SURVIVOR NT Series units are available as high-base and low-base pillow blocks, and 2-bolt and 4-bolt flanged cartridges for popular shaft sizes of  $\frac{1}{2}$  in. through  $2\frac{15}{16}$  in. (and selected metric diameters). Timken also produces a take-up unit in the SURVIVOR NT Series in limited shaft sizes (RTU-NT). The bearing inserts are available with self-locking collars. The SURVIVOR NT Series is dimensionally interchangeable with the current line of Timken cast iron housed units.

The SURVIVOR NT Series provides extraordinary corrosion resistance in a durable package suitable for food and beverage industries, materials handling operations, dairy and refrigeration applications, as well as HVAC, chemical, maritime and other highly corrosive environments.

All materials used in the SURVIVOR assemblies, including the grease, are approved for USDA and FDA compliant industries.

### ORDERING INFORMATION

To order complete SURVIVOR nickel-plated assemblies, simply add the "NT" suffix to the cast iron housed unit designations. Example:

**RCJT 1 NT or RAK  $\frac{3}{4}$  NT**

Refer to the corresponding cast iron housing design for dimensional data. Consult your Timken sales representative or an authorized distributor for shaft size availability.

SURVIVOR inserts can be ordered using Timken's standard part number for wide inner ring bearings with a "TDCF" suffix. Example:

**G1100KRRB + COL TDCF**

<b>NT SERIES</b>	
<b>COMPONENT</b>	<b>MATERIAL</b>
Balls	Stainless Steel
Ball Retainer	Nylon
Collar	Stainless Steel
Rings	TDC plated
Grease	FDA Approved
Housing Finish	Nickel Plating
Grease Fitting	Stainless Steel
Grease Fitting Cover	Nylon
Seals	Synthetic Rubber
Seal Caps	Stainless Steel
Setscrew <sup>(1)</sup>	Stainless Steel

<sup>(1)</sup> Standard SURVIVOR NT units are only available in the "R" series, self-locking collar types. Setscrew lock series ("Y") units are available for minimum quantity orders.

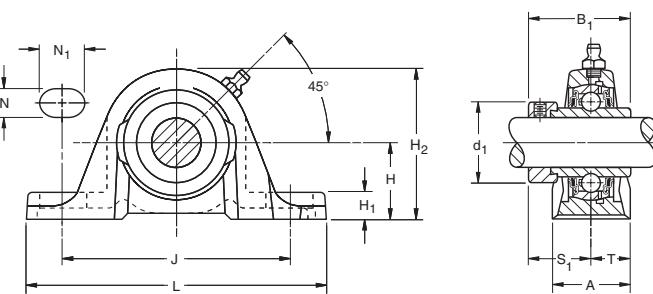

## RAK, TAK, LAK INDUSTRIAL SERIES

Timken RAK, TAK and LAK pillow blocks are suggested for industrial applications where normal loads are encountered.

- A compact, one-piece housing that can be mounted in any position.
- Pillow blocks self-align at mounting with the spherical outside diameter of the bearing fitting into corresponding spherical housing seat.
- Units are prelubricated and ready for immediate installation.
- Grease fitting is provided for relubrication.
- Self-locking collars are supplied with all units.
- RAK pillow block is equipped with G-KRRB (R-Seal) wide inner ring bearings, the TAK with G-KPPB (Tri-Ply Seal) wide inner ring bearings and the LAK with the G-KLLB (Mechani-Seal) wide inner ring bearings.
- **Contact a Timken representative to discuss highly corrosive applications (food processing, chemical exposure) where Timken thin dense chrome coated bearings can be utilized.**

**Suggested shaft tolerances:**  $\frac{1}{2}'' - 1\frac{15}{16}''$ , nominal to  $-.013$  mm,  $-.0005''$ ;  $2'' - 2\frac{15}{16}''$ , nominal to  $-.025$  mm,  $-.0010''$ .

(1) Bearing number for RAK is G-KRRB. TAK uses G-KPPB type LAK uses G-KLLB. Note: All units have  $1/8$  pipe thread grease fitting except  $1/2$ - $1\frac{11}{16}$  and  $3/4$  units which have  $1/4$ -28 fitting.

## YAK INDUSTRIAL SERIES SETSCREW UNITS

- Timken Series low-base setscrew pillow blocks feature the GY-KRRB bearing.
- Well-suited for industrial applications with normal loads, due to its full width inner ring setscrew.
- Contact a Timken representative to discuss highly corrosive applications (food processing, chemical exposure) where Timken thin dense chrome coated bearings can be utilized.

Suggested shaft tolerances:  **$\frac{1}{2}'' - 1\frac{15}{16}''$ , nominal to  $-.013 \text{ mm}, -.0005''$** ;  **$2'' - 2\frac{15}{16}''$ , nominal to  $-.025 \text{ mm}, -.0010''$** .

Shaft diameter with an S = smaller housing.

D

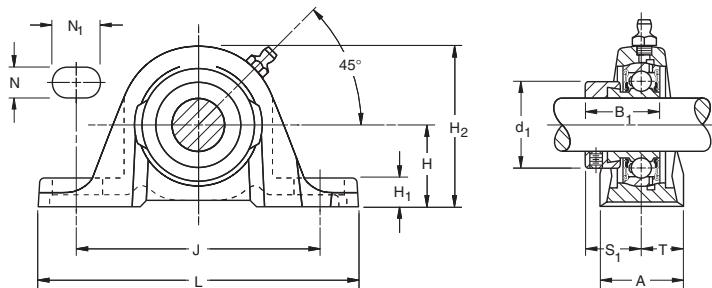

# BALL BEARINGS

## VAK STANDARD SERIES

- The streamlined and rugged VAK pillow block unit combines engineered housing and RA-RR extended inner ring bearing.
- RA-RR bearing employs a positive contact land-riding seal and a Timken originating self-locking collar. Collar assures positive shaft retention.
- Pillow block can be mounted to operate in any position.
- Bearing housed units are factory prelubricated, but a grease fitting is provided to allow for relubrication if required.

Suggested shaft tolerances:  $\frac{1}{2}'' - \frac{1\frac{15}{16}}{16}''$ , nominal to  $-.013$  mm,  $-.0005$ ;  
 $2'' - \frac{2\frac{3}{16}}{16}''$ , nominal to  $-.025$  mm,  $-.0010$ .

Shaft diameter with an S = smaller housing.

## RAS, TAS, LAS INDUSTRIAL SERIES

- Timken RAS, TAS and LAS pillow blocks are similar in design and equal in load-carrying capacity to the RAK, TAK and LAK types.
- RAS, TAS, and LAS types have a slightly higher base-to-center height dimension than the RAK, TAK and LAK types, making them interchangeable with other competitive designs.
- RAS pillow block is equipped with G-KRRB (R-Seal) wide inner ring bearing, the TAS with G-KPPB (Tri-Ply Seal) wide inner ring bearings, and the LAS with the G-KLLB (Mechani-Seal) wide inner ring bearings.
- Contact your Timken representative to discuss highly corrosive applications (food processing, chemical exposure) where Timken thin dense chrome coated bearings can be utilized.

Suggested shaft tolerances:  $\frac{1}{2}$ " -  $1\frac{15}{16}$ ", nominal to -.013 mm, -.0005";  
 $2"$  -  $2\frac{3}{16}$ ", nominal to -.025 mm, -.0010".

<sup>(1)</sup>Bearing number for RAS is G-KRRB. TAS uses G-KPPB, type LAS uses G-KLLB.

Note: All units have  $1/8$  pipe thread grease fitting except  $1\frac{11}{16}$  and  $3/4$  units which have  $1/4$ -28 fitting.

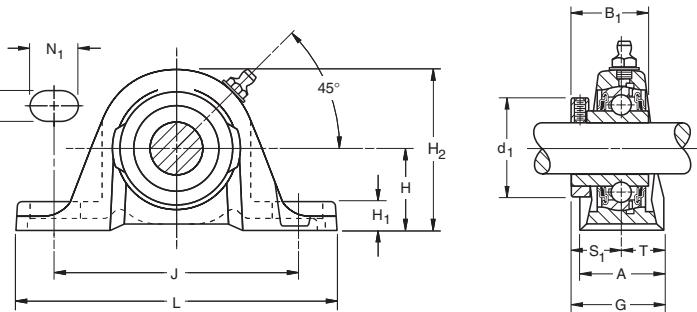

# BALL BEARINGS

## RASC INDUSTRIAL SERIES CONCENTRIC COLLAR

- All RASC pillow blocks are equipped with GC-KRRB (R-Seal) wide inner ring bearings with concentric collars.
- Pillow blocks self-align at mounting with the spherical outside diameter of the bearing fitting into a corresponding spherical housing seat.
- Units are prelubricated and ready for immediate installation.
- Grease fitting provides for relubrication if required.
- Concentric collars are supplied with all units.

**Suggested shaft tolerances:**  $\frac{1}{2}'' - 1\frac{15}{16}''$ , nominal to  $-.013$  mm,  $-.0005$ ";  
 $2'' - 2\frac{15}{16}''$ , nominal to  $-.025$  mm,  $-.0010$ ".

## YAS INDUSTRIAL SERIES SETSCREW UNITS

- Timken YAS Series high-base, setscrew, pillow blocks feature the GY-KRRB bearing.
- This full-width inner ring setscrew is well-suited for industrial applications involving wet or dirty environments.
- Housing is designed for two-bolt mounting in any position.
- Contact your Timken representative to discuss highly corrosive applications (food processing, chemical exposure) where Timken thin dense chrome coated bearings can be utilized.

Suggested shaft tolerances:  $\frac{1}{2}$ " to  $1\frac{15}{16}$ ", nominal to -.013 mm, -.0005";

Shaft diameter with an S = Smaller housing; Shaft diameter with an H = heavier housing.

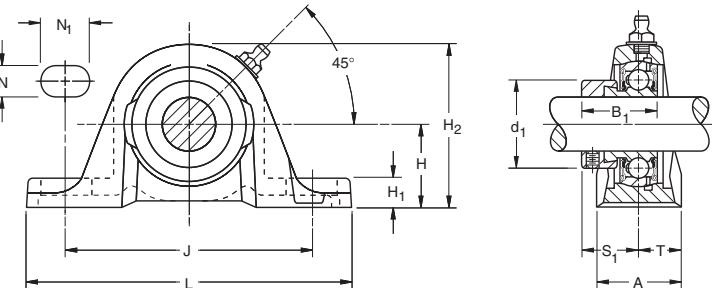

# BALL BEARINGS

## VAS STANDARD SERIES

- Timken pillow blocks are similar in design and features, and equal in load-carrying capacity to the VAK Series.
- Slightly different base-to-center height dimension make them interchangeable with certain other competitive designs.
- Units are prelubricated and ready for immediate installation.
- Grease fitting provides for relubrication if required.

**Suggested shaft tolerances:**  $\frac{1}{2}'' - 1\frac{15}{16}''$ , nominal to  $-.013$  mm,  $-.0005$ ";  
 $2'' - 2\frac{3}{16}''$ , nominal to  $-.025$  mm,  $-.0010$ ".

## SAS STANDARD SERIES

- The SAS is a streamlined and a rugged one-piece pillow block unit that combines the Timken engineered housing and GYA-RRB setscrew bearing.
- GYA-RRB bearing employs a positive contact land-riding seal and specially designed setscrews.
- SAS pillow block can be mounted in and will operate in any position.
- Bearing housed units are factory prelubricated, but a grease fitting is provided to allow for relubrication if required.

**Suggested shaft tolerances:**  $\frac{1}{2}'' - 1\frac{15}{16}''$ , nominal to  $-.013$  mm,  $-.0005$ ";  
 $2'' - 2\frac{3}{16}''$ , nominal to  $-.025$  mm,  $-.0010$ ".

**Note:** All units have 1/8 pipe thread grease fitting except 1/2-11/16 and 3/4 units which have 1/4-28 fitting.  
 Shaft diameter with an S = smaller housing; Shaft diameter with an H = heavier housing.

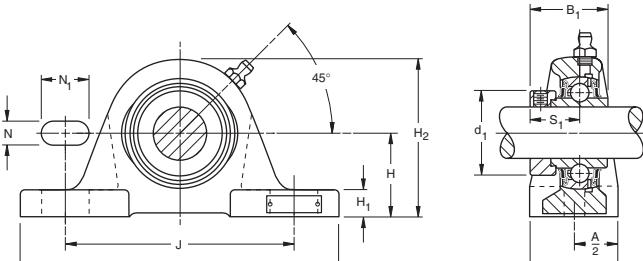

# BALL BEARINGS

## RAKH INDUSTRIAL SERIES

- Timken pillow blocks are similar in design to other standard series, but have slightly different dimensions to allow interchangeability with competitive designs.
- May be used independently or in connection with RAKHL expansion unit shown below. Used in this capacity, the RAKH pillow blocks provide fixed shaft location while the RAKHL expansion units allows for axial movement. Maximum operating temperature for the RAKH units is 250° F (121° C).
- Units are supplied with self-locking collars.
- Contact your Timken representative to discuss highly corrosive applications (food processing, chemical exposure) where Timken thin dense chrome coated bearings can be utilized.

Suggested shaft tolerances:  $1\frac{13}{16}'' - 1\frac{15}{16}''$ , nominal to  $-.013$  mm,  $-.0005''$ ;  
 $2'' - 2\frac{15}{16}''$ , nominal to  $-.025$  mm,  $-.0010''$ .

<sup>(1)</sup> When used with the expansion unit, specify both units, shaft diameter and suffix.

## RAKHL EXPANSION SERIES

- Designed to allow axial shaft expansion caused by elevated temperatures or other conditions that lead to shaft movement.
- Designed for use with the RAKH pillow blocks.
- RAKH units provide axial shaft location and the RAKHL allows shaft floatation.
- Due to limitations of the lubricant and seal material, the maximum operating temperature for the RAKHL units is 250° F (121° C).
- Units are supplied with self-locking collars.
- Steel "S" ring assures axial expansion.

**Suggested shaft tolerances:**  $\frac{13}{16}$ " -  $1\frac{15}{16}$ ", nominal to -.013 mm, -.0005";  
 $2"$  -  $2\frac{15}{16}$ ", nominal to -.025 mm, -.0010".

## YASM MEDIUM DUTY SERIES SETSCREW LOCK

- Timken YASM medium-duty pillow blocks feature the GYM-KRRB bearing inserts.
- Ideal for conveyer, fan and blower, sawmill, and feed and grain handling applications.
- Cast iron housings are durable, powder-paint coated and maintain an excellent finish while resisting corrosion, chemicals and weather exposure.
- Incorporates premium features designed to extend bearing life.

Suggested shaft tolerances: 1" - 1<sup>15</sup>/<sub>16</sub>", nominal to -.013 mm, -.0005";  
2" - 3", nominal to -.025 mm, -.0010".

## STB SERIES

- STB two-bolt housed units come assembled and ready for mounting.
- Ideal for applications where space is limited, bolt screws are accessed from the bottom of the unit, loads are not severe and reversing moments are not encountered.
- Units are assembled with GYA-RRB bearings with positive contact land-riding seals and setscrew locking.
- Units are factory prelubricated, but a grease fitting is provided for relubrication if required.

## VTB SERIES

- VTB two-bolt housed units are nearly identical to the STB unit, except they are assembled with the GRA-RRB bearings and positive contact R-Seals and locking collar.

## RAO, LAO HEAVY SERIES

- Compact, economic, heavy-duty ball bearing housed unit.
- Incorporates the tested and proven features of the Timken standard RAK Series pillow block.
- RAO Series bearings are equipped to handle heavy capacity.
- LAO Series bearings are equipped with heavy series GN-KLLB wide inner ring bearings.
- Units are supplied with a self-locking collar that eliminate shaft shoulders, machining adapters and sleeves, and locknuts that provide easy mounting.

**Suggested shaft tolerances:** **1  $\frac{3}{16}$ " - 1  $\frac{15}{16}$ ", nominal to -.013 mm, -.0005";**  
**2" - 2  $\frac{15}{16}$ ", nominal to -.025 mm, -.0010".**

# BALL BEARINGS

## RSA, LSA INDUSTRIAL SERIES

- RSA Series are equipped with G-KRRB wide inner ring ball bearings.
- LSA Series are equipped with G-KLLB wide inner ring bearings.
- Pillow blocks are prelubricated and ready for immediate use.
- Grease fitting is provided for relubrication if required.
- All units are supplied with a self-locking collar.

Suggested shaft tolerances:  $\frac{1}{2}'' - 1\frac{15}{16}''$ , nominal to  $-.013\text{ mm}, -.0005''$   
 $2'' - 3\frac{15}{16}''$ , nominal to  $-.025\text{ mm}, -.0010''$ .

## RSAO, LSAO HEAVY SERIES

- RSAO pillow blocks are equipped with GN-KRRB wide inner ring ball bearings.
- LSAO pillow blocks are equipped with GN-KLLB wide inner ring ball bearings.
- Suited for installations where the load is heavy in proportion to the shaft diameter or where considerable shock loads exist.
- For use in wet or extremely dirty conditions.
- Prelubricated and ready for immediate use and a grease fitting is provided for relubrication if required.
- All units are supplied with a self-locking collar.

Suggested shaft tolerances: **1 1/16", nominal to -.013 mm, -.0005"**  
**2" - 3 15/16", nominal to -.025 mm, -.0010"**.

# BALL BEARINGS

## SAL INDUSTRIAL SERIES FIXED & FLOATING TYPES

- Designed for applications where normal to high temperatures are encountered and applications where one or more floating bearing units are required.
- The floating unit allows the bearing to move axially as the shaft expands due to rising temperatures. The fixed unit maintains shaft location.
- Bearings have loose internal fit.
- SAL unit is equipped with a self-aligning SM wide inner ring bearing and a self-locking collar.
- External aligning ring is fitted to the spherical surface of the outer ring.
- Equipped with oil-tight seals. Normally fitted for oil lubrication, but can be equipped for grease lubrication when specified.
- Before installation, lubricate with high-grade automotive oil, turbine oil, or ball bearing grease.**
- Units are assembled with a spacer ring (fixed type). By removing spacer ring, the assembly becomes a floating unit.

## SAOL HEAVY SERIES FIXED & FLOATING TYPES

- Designed for applications with higher than usual temperatures or where one or more floating bearing units are required.
- Floating unit allows the bearing to move axially as the shaft expands due to temperature rise. The fixed unit maintains shaft locations.
- Bearings have loose internal fit.
- SAOL unit is equipped with a self-aligning SMN wide inner ring bearing and a self-locking collar.
- External aligning ring is fitted to the spherical surface of the outer ring.
- Equipped with oil-type seals. Normally fitted for oil lubrication, but can be equipped for grease lubrication when specified.
- Before installation, lubricate with high-grade automotive oil, turbine oil, or ball bearing grease.**
- Units are assembled with a spacer ring (fixed type). By removing the spacer ring, the assembly becomes a floating unit.

**Suggested shaft tolerances:**  $1\frac{3}{16}'' - 1\frac{15}{16}''$ , nominal to  $-0.013$  mm,  $-0.0005''$ ;  
 $2'' - 3\frac{15}{16}''$ , nominal to  $-0.025$  mm,  $-0.0010''$ .  
Larger sizes, consult your Timken representative.

<sup>(1)</sup> When four bolts are used, dimension J<sub>1</sub> is distance between centers, and A<sub>1</sub> and T are measured from center of base.

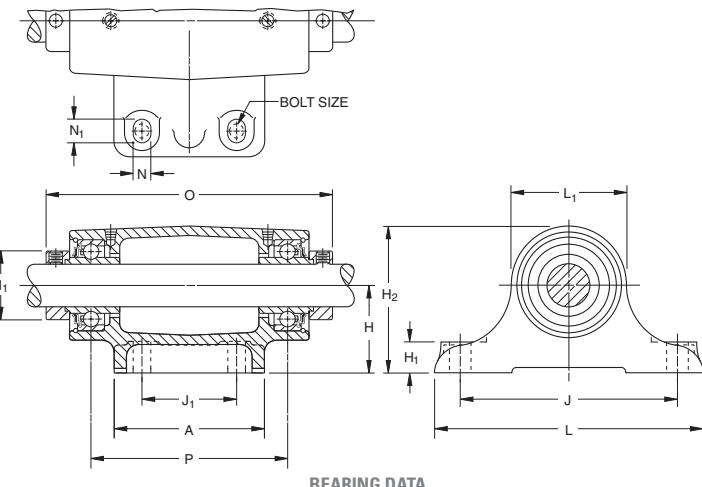

# BALL BEARINGS

## DRNR INDUSTRIAL SERIES

- This rigid double pillow block is designed to provide a sturdy two-bearing mounting for fans and blowers, bench grinders, buffers, vertical shafts and similar heavy-duty applications.
- Compact, one-piece housing is equipped with two wide inner ring bearings with integral R-Seals and self-locking collar.
- Individual grease chambers provided for each bearing.
- Close clearance baffles allow excess grease to work into the center chamber of the housing.
- Grease fittings that take the place of standard pipe plugs provide the means of relubrication.
- Can be mounted in any position, with ample radial and thrust capacity assured at all times.

**Suggested shaft tolerances:**  $1\frac{15}{16}'' - 1\frac{15}{16}''$ , nominal to  $-.013$  mm,  $-.0005$ ";  
 $2'' - 2\frac{3}{16}''$ , nominal to  $-.025$  mm,  $-.0010$ ".

## RCJ, TCJ, LCJ INDUSTRIAL SERIES

- Timken cartridges are used in applications where a minimum amount of machining is to be done.
- Each unit comes assembled and ready for mounting, with bolts through the flange.
- Wide inner ring bearings, self-aligning B-types, which compensate for shaft misalignment.
- RCJ flange cartridge is equipped with G-KRRB (R-Seal) wide inner ring bearings. The TCJ is equipped with G-KPPB (Tri-Ply Seal) wide inner ring bearings. The LCJ is equipped with the G-KLLB (Mechani-Seal) wide inner ring bearings.
- TCJ flange cartridges are identical to RCJ units, except they use the Tri-Ply seal bearing. Tri-Ply units offer the best protection in dirty environments.
- Units are factory prelubricated, but a grease fitting is provided for relubrication if required. Units are supplied with self-locking collars.
- Contact a Timken representative to discuss highly corrosive applications (food processing, chemical exposure) where Timken thin dense chrome coated bearings can be used.**
- Safety end caps are available for selected sizes.

D

(1) Bearing number for RCJ is G-KRRB. TCJ uses G-KPPB.

(2) Type LCJ uses G-KLLB.

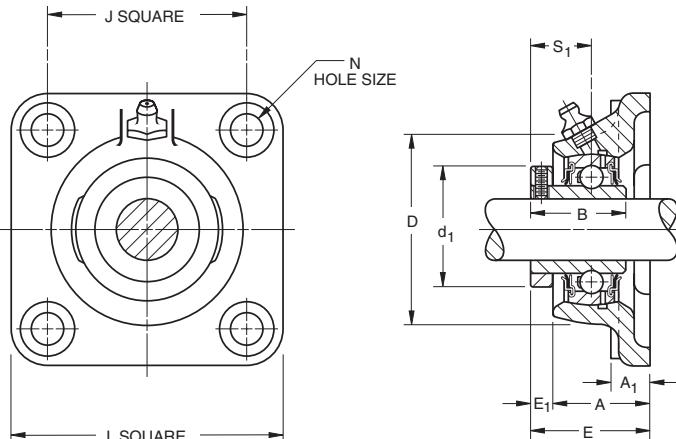

# BALL BEARINGS

## RCJC INDUSTRIAL SERIES CONCENTRIC COLLAR

- The same basic design as the RCJ Series, except a concentric collar is used as the shaft locking device instead of a self-locking cam collar.
- All RCJC units are equipped with GC-KRRB wide inner ring, concentric collar bearings.
- Spherical outside diameter of the bearings mounted in corresponding machined housing seats provides the initial self-alignment.
- Bolt hole spacing dimensions are interchangeable with the RCJ Series and most competitive units.
- Units are factory prelubricated, but a grease fitting is provided for relubrication if required.
- Concentric collars are supplied with all units.
- Safety end caps are available for selected sizes.

**Suggested shaft tolerances:**  $\frac{1}{2}''$  -  $1\frac{15}{16}''$ , nominal to  $-.013$  mm,  $-.0005$ ;  
 $2''$  -  $2\frac{15}{16}''$ , nominal to  $-.025$  mm,  $-.0010$ .

Shaft diameter with an S = smaller housing.

## YCJ INDUSTRIAL SETSCREW SERIES

- The same basic design as the RCJ Series, except specially designed setscrews are used as the locking device instead of an eccentric collar.
- All units are equipped with GY-KRRB wide inner ring, setscrew bearings.
- Spherical outside diameter of the bearings mounted in the corresponding machined housing seats provides the initial self-alignment.
- Bolt hole spacing dimensions are interchangeable with the RCJ Series and most competitive units.
- Units are factory prelubricated, but a grease fitting is provided for relubrication if required.
- Safety end caps are available for selected sizes.

**Suggested shaft tolerances:**  $\frac{1}{2}'' - 1\frac{15}{16}''$ , nominal to  $-.013$  mm,  $-.0005$  in;  
 $2'' - 2\frac{15}{16}''$ , nominal to  $-.025$  mm,  $-.0010$  in.

Shaft diameter with an S = smaller housing.

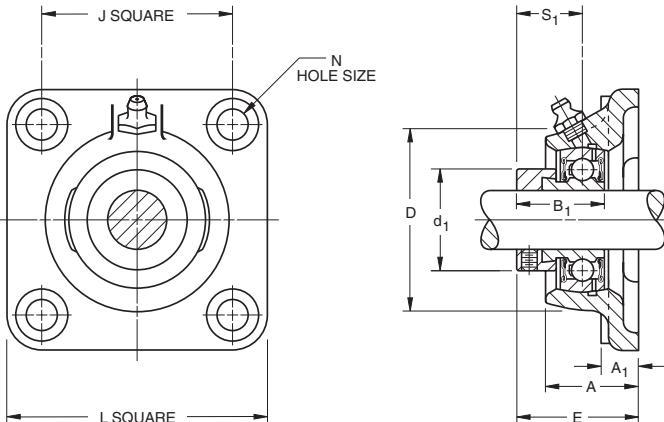

# BALL BEARINGS

## VCJ STANDARD SERIES

- Flange cartridges come assembled and ready for mounting by using four bolts through the flange.
- VCJ Series flange cartridges are ideal for applications where minimum machining is to be done.
- Units are assembled with GRA-RRB bearings with positive contact land-riding seals and self-locking collars.
- Units are factory prelubricated, but a grease fitting is provided for relubrication if required.
- Safety end caps are available for selected sizes.

**Suggested shaft tolerances:**  $\frac{1}{2}'' - 1\frac{15}{16}''$ , nominal to  $-.013$  mm,  $-.0005$ ;  
 $2'' - 2\frac{3}{16}''$ , nominal to  $.025$  mm,  $-.0010$ .

Shaft diameter with an S = smaller housing.

## SCJ STANDARD SERIES

- Flange cartridges come assembled and ready for mounting by using four bolts through the flange.
- Ideal for applications where minimum shaft length is required.
- Units are assembled with GYA-RRB bearings with positive contact land-riding seals and setscrew locking.
- Units are factory prelubricated, but a grease fitting is provided for relubrication if required.
- Safety end caps available for selected sizes.

## RCJO, LCJO HEAVY SERIES

- Flange cartridges are similar in design to the standard series.
- Ideal for applications where minimum machining is to be done.
- Units come assembled and ready for mounting by using four bolts through the flange.
- RCJO units are assembled with GN-KRRB (R-Seal) wide inner ring bearings. LCJO units are equipped with GN-KLLB (L-Seal) wide inner ring bearings.
- Units are factory prelubricated, but a grease fitting is provided for relubrication if required.
- Units are supplied with self-locking collars and are dimensionally interchangeable.

## YCJM MEDIUM DUTY SERIES SETSCREW LOCK

- Four-bolt flanged cartridges featuring GYM-KRRB bearing inserts.
- Ideal for conveyor, fan and blower, sawmill, and feed and grain handling applications.
- Durable, cast iron housings are powder-paint coated and maintain an excellent finish while resisting corrosion, chemicals and weather exposure.
- Industrial-duty flanged cartridges incorporate premium features designed to extend bearing life.

**Suggested shaft tolerances:** 1" - $1\frac{15}{16}$ ", nominal to -.013 mm, -.0005";  
2" - 3", nominal to -.025 mm, -.0010".

**TO ORDER, SPECIFY UNIT AND SHAFT DIAMETER. Example: YCJM 1 7/16".**

## BALL BEARINGS

### YCJTM MEDIUM DUTY SERIES SETSCREW LOCK

- Medium-duty, two-bolt flanged cartridges feature GYM-KRRB bearing inserts.
- Ideal for conveyor, fan and blower, sawmill, and feed and grain handling applications.
- Durable, cast iron housings are powder-paint coated and maintain an excellent finish while resisting corrosion, chemicals and weather exposure.
- Industrial-duty flanged cartridge units incorporate premium features designed to extend bearing life. They can replace competitive designs.

**Suggested shaft tolerances:** 1" -  $1\frac{15}{16}$ ", nominal to -.013 mm, -.0005";  
2" - 3", nominal to -.025 mm, -.0010".

## RCJT, TCJT, LCJT INDUSTRIAL SERIES

- Cartridges are the same basic design as RCJ, TCJ, and LCJ types, except they have two bolt holes instead of four.
- Primarily designed for applications where the mounting area is restricted.
- RCJT cartridge is equipped with G-KRRB (R-Seal) wide inner ring bearings. The TCJT is equipped with G-KPPB (Tri-Ply Seal) wide inner ring bearings. The LCJT is equipped with the G-KLLB (Mechani-Seal) wide inner ring bearings.
- Units are factory prelubricated, but a grease fitting is provided for relubrication.
- Safety end caps are available for selected sizes.

<sup>(1)</sup> Add C1 suffix to collar numbers for G...KPPB2 bearings (TCJT).

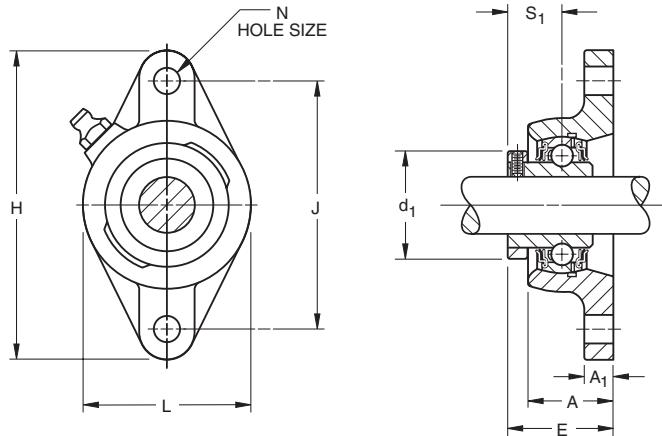

Shaft diameter with an S = smaller housing.

# BALL BEARINGS

## RCJTC INDUSTRIAL SERIES CONCENTRIC COLLAR

- Same basic design as RCJT, except they use the concentric collar rather than the self-locking eccentric collar as the shaft locking device.
- All units are equipped with GC-KRRB wide inner ring concentric collars.
- The spherical outside diameter mounted in the corresponding machined housing seats provides the initial self-alignment.
- Bolt hole spacing dimensions are interchangeable with the RCJT Series and most competitive units.
- Units are factory prelubricated. A grease fitting is provided for relubrication.
- Safety end caps are available for selected sizes.

Shaft diameter with an S = smaller housing.

## VCJT STANDARD SERIES

- Same design and features as the VCJ Type, but has two bolt holes instead of four. This allows for mounting in restricted areas.
- Assembled with GRA-RRB bearings with positive contact land-riding seals and self-locking collars.
- Units are factory prelubricated. A grease fitting is provided for relubrication.
- Safety end caps are available for selected sizes.

# BALL BEARINGS

## YCJT INDUSTRIAL SETSCREW SERIES

- Same design as the YCJ Series, but mounted with two bolts instead of four.
- All are equipped with GY-KRRB wide inner ring, setscrew bearings.
- Spherical outside diameter mounted in the corresponding machined housings seats provides the initial self-alignment.
- Units are factory prelubricated. A grease fitting is provided for relubrication.
- Safety end caps are available for selected sizes.

**Suggested shaft tolerances:**  $\frac{1}{2}'' - 1\frac{15}{16}''$ , nominal to  $-.013$  mm,  $-.0005$ ;  
 $2'' - 3\frac{7}{16}''$ , nominal to  $-.025$  mm,  $-.0010$ .

Shaft diameter with an S = smaller housing.

## SCJT STANDARD SERIES

- Same construction and design as SCJ Type, but mounted with two bolts instead of four.
- Assembled with GYA-RRB bearings with positive contact land-riding seals and setscrew locking.
- Units are factory prelubricated. A grease fitting is provided for relubrication.

**Suggested shaft tolerances:**  $\frac{1}{2}''$  -  $1\frac{15}{16}''$ , nominal to  $-.013$  mm,  $-.0005$ ;  
 $2''$  -  $\frac{3}{16}''$ , nominal to  $-.025$  mm,  $-.0010$ .

Shaft diameter with an S = smaller housing.

D

# BALL BEARINGS

## FLCT STANDARD SERIES

- Versatile power transmission units are designed to provide sturdy shaft support in minimum space at minimum cost.
- Space-saving, two-bolt unit mounts flush against the frame.
- Bolt hole spacing and size is the same as the pressed-steel flangette unit.
- Equipped with RA-RRB extended inner ring ball bearings with positive contact land-riding seals.
- Permanently prelubricated.
- Positively resistant against contaminants.

Suggested shaft tolerances: nominal to  $-.013\text{ mm}$ ,  $-.0005\text{ "}$ .

## RFC INDUSTRIAL PILOTED SERIES CONCENTRIC COLLAR

- Piloted flange cartridges assure accurate mounting fits and provide better support for heavy loads.
- Cast iron units are suited for applications such as material handling, industrial conveyor equipment, and farm and construction equipment.
- Assembled with R-Seal (GC-KRRB) bearings with a concentric locking collar.
- Units are factory prelubricated. A grease fitting is provided for relubrication if required.

**Suggested shaft tolerances:**  $\frac{1}{2}'' - \frac{1\frac{15}{16}}{16}''$ , nominal to  $-.013$  mm,  $.0005''$ ;  $2'' - \frac{2\frac{3}{16}}{16}''$ , nominal to  $-.025$  mm,  $-.0010''$ .

(1) All units have a 1/4-28 grease fitting.

Shaft diameter with an S = smaller housing.

# BALL BEARINGS

## RC SERIES

- Convenient for mounting in straight-bore housings.
- Bearing features a self-locking collar and spherical outside diameter fitted to a corresponding spherical seat in the cartridge that provides self-alignment.
- Equipped with a G-KRRB (R-Seal) bearing.

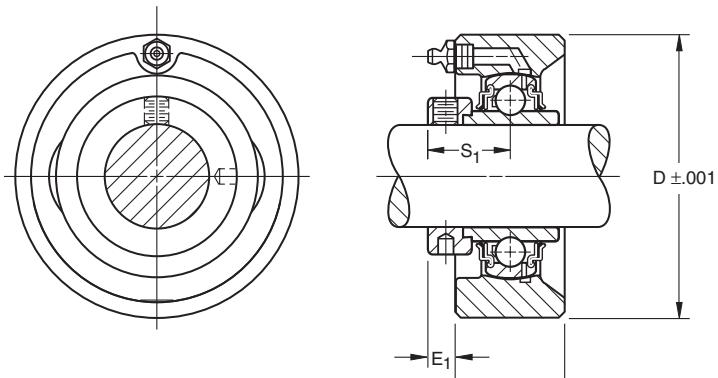

### Suggested housing bore:

Shaft Rotating: nominal +.025 mm to +.076 mm, +.001" to +.003".

Shaft Stationary: nominal +.00 mm to -.050 mm, +.000" to -.002".

Avoid excessive tightening of anchor bolts.

**Suggested shaft tolerances:**  $\frac{1}{2}$ " -  $1\frac{15}{16}$ ", nominal to -.013 mm, -.0005";  
 $2"$  -  $3\frac{15}{16}$ ", nominal to -.025 mm, -.0010".

All units have  $\frac{1}{4}$ "-28 grease fittings.

## PBS SERIES

- Economical transmission unit for light-duty, moderate-speed requirements.
- Housing includes two heavy-gage, zinc-plated steel stampings. One is a standard stamping used in the MST two-bolt flanette unit.
- RA-RRB (extended inner-ring) bearings are regularly furnished with this bearing. RR wide inner rings also can be used.
- Timken self-locking collar completes the assembly.
- Made with precision bearing seat and dimensions held to close tolerances. This provides accurate bearing-to-housing fit and assures proper alignment of parts.
- RA-RRB bearing used in the PBS pillow block has positive contact land-riding seals. It includes a shroud cap design and is permanently prelubricated.
- Base-to-center height and bolt spacing are interchangeable with many other pillow blocks on the market.

Suggested shaft tolerances: nominal to -.013 mm, -.0005".

<sup>(1)</sup> Stamping thrust rating is 1/5 of stamping radial load rating.

Shaft diameter with an S = smaller housing.

# BALL BEARINGS

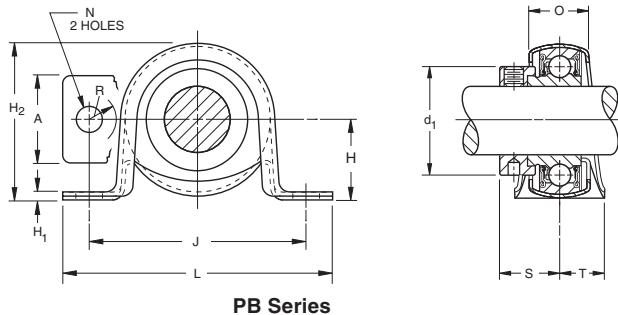

## PB SERIES - RPB SERIES

- PB Series provides the advantages of ball bearings at an economical price.
- Used for light-duty applications.
- Consists of a two-piece separable zinc-plated steel housing with spherical bearing seat. This allows the spherically ground bearing to have initial self-alignment in all directions.
- The ball bearing is a RA-RRB extended inner ring type with positive contact land-riding seals and a self-locking collar.
- Incorporates improved shroud cap design and comes permanently prelubricated.
- RPB has same construction as PB-Type, but with a thick, electrically-conductive rubber interliner.
- Bearings in the RPB unit are designated as RA-RRB F-450 and have a special ball and race finish for quiet operation.
- RABR unit consists of the bearing with the rubber interliner.

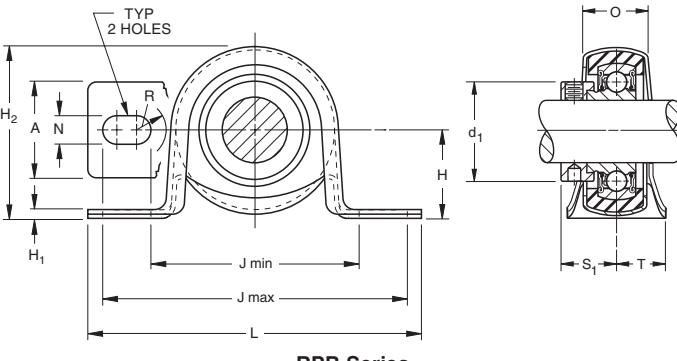

Suggested shaft tolerances: nominal to **-.013 mm, -.0005"**.

Shaft diameter with an S = smaller housing.

(1) Housing thrust rating is 1/3 of housing radial load rating.

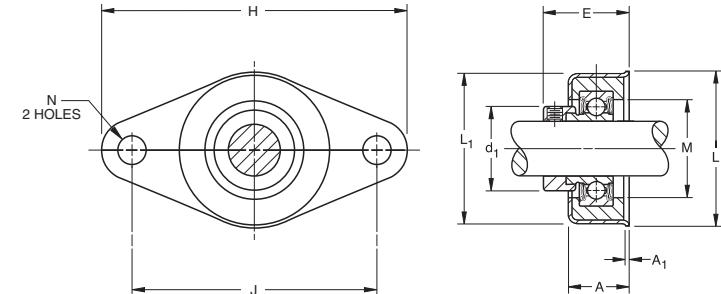

## LFST SERIES

- Zinc-plated, pressed-steel and flush-mounted.
- Simplifies bearing flange unit installations.
- Conductive rubber interliner reduces noise and vibration. Allows for alignment while pressed-steel flange assures rigid bearing support.
- Bolt hole spacing permits interchangeability with competitive mountings.
- Offers compact, economical, corrosion-resistant housing and balanced design.
- Features Timken RAL light series ball bearings. The RAL provides precision in an extended inner ring bearing with superior shroud seal protection and self-locking collar.
- Bearings are prelubricated.

Suggested shaft tolerances: nominal to -.013 mm, -.0005".

TO ORDER, SPECIFY UNIT AND SHAFT DIAMETER. Example: LFST 1". POPULAR SIZES ARE IN BOLD.

LFST	RAL...NPP	Page D60

(1) Housing thrust rating is 1/3 of housing radial load rating. Maximum suggested speed is 2400 RPM.

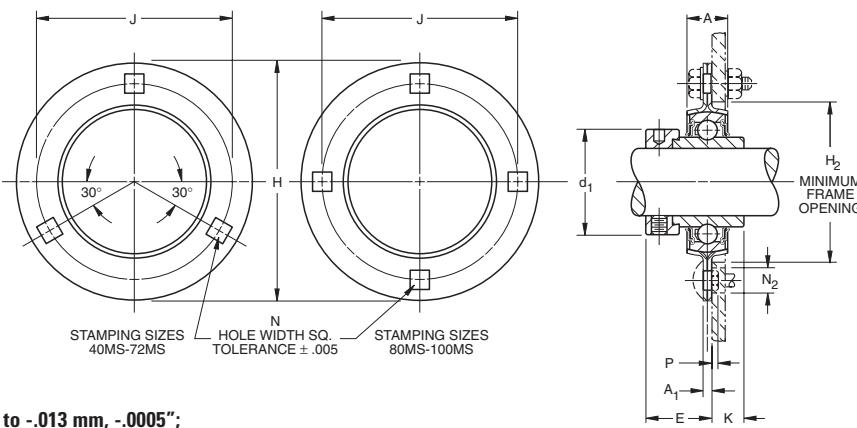

# BALL BEARINGS

## RR FLANGETTE UNIT

- Consists of two interchangeable, pressed-steel, zinc-plated flanges housing a standard bearing with self-locking collar.
- Spherical inside surfaces of each pair of flanges mate with the spherical outside surface of the bearing's outer ring. This provides initial self-alignment.
- Flangette is equipped with the KRRB (R-Seal) wide inner ring ball bearing.
- All units are non-relubricatable.

**Suggested shaft tolerances:**  $\frac{1}{2}'' - 1\frac{15}{16}''$ , nominal to  $-.013$  mm,  $-.0005$ ";  
 $2'' - 2\frac{3}{16}''$ , nominal to  $-.025$  mm,  $-.0010$ ".

<sup>(1)</sup> Thrust ratings for stamping are 50% of radial ratings.

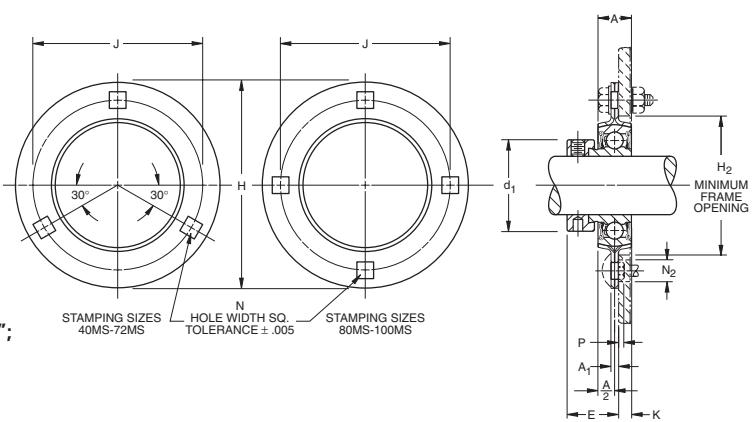

<sup>(2)</sup> Stampings must be ordered in pairs to assemble bearing.

Shaft diameter with an S = smaller housing.

## RA FLANGETTE UNIT

- Similar to Timken RR flangette unit.
- Consists of two interchangeable, pressed-steel, zinc-plated flanges that house a standard ball bearing.
- Incorporates an extended inner ring bearing with a self-locking collar and spherical seat in the cartridge, providing initial self-alignment.
- Equipped with a RA-RRB extended inner ring ball bearing.
- Units are non-relubricatable.

**Suggested shaft tolerances:**  $\frac{1}{2}'' - 1\frac{15}{16}''$ , nominal to  $-.013$  mm,  $-.0005$ ;  
 $2'' - 2\frac{3}{16}''$ , nominal to  $-.025$  mm,  $-.0010$ .

# BALL BEARINGS

## RAT, RRT TWO-BOLT FLANGETTE UNITS

- Designed for installations where the standard three-bolt flangettes cannot be used due to space limitations.
- Like standard three-bolt flangettes, they are available with RA-RRB extended inner ring ball bearings and the KRRB wide inner ring ball bearings (RRT) with self-locking collars.
- All units are non-relubricatable.

Suggested shaft tolerances:  $\frac{1}{2}$ "  $1\frac{15}{16}$ ", nominal to  $-.013$  mm,  $-.0005$ ";  
 $2"$   $2\frac{3}{16}$ ", nominal to  $-.25$  mm,  $-.0010$ ".

(1) Thrust ratings for stamping are 50% of radial ratings.

(2) Stampings must be ordered in pairs to assemble bearing.

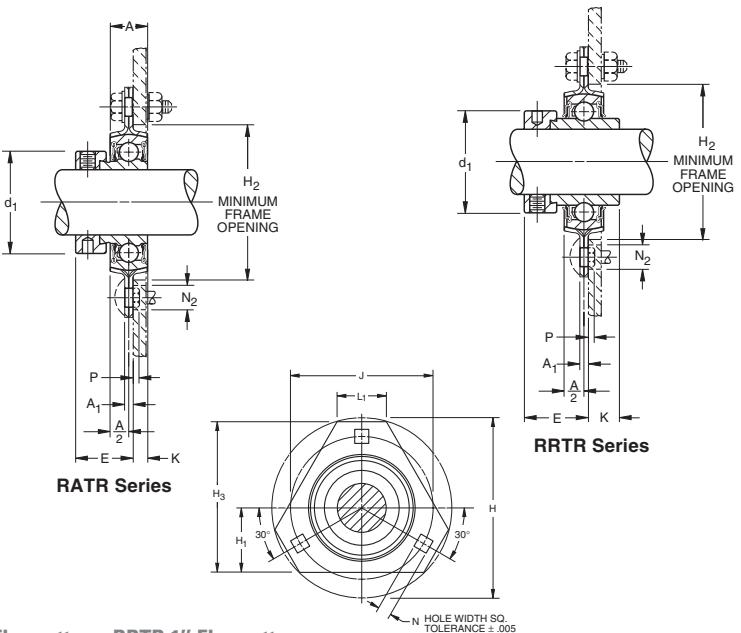

Shaft diameter with an S = smaller housing.

## RATR, RRTR TRIANGLE FLANGETTE UNITS

- Similar to standard 47MS, 52MS, 62MS and 72MS, except the stamping is triangular instead of round.
- Used where space is a factor or where it is necessary to cut off one or more sides of the standard flangette stamping.
- RA-RRB and KRRB may be used with this stamping, as with other types of flangettes.
- All units are non-relubricatable.

**Suggested shaft tolerances:**  $\frac{1}{2}'' - 1\frac{15}{16}''$ , nominal to  $-.013$  mm,  $-.0005$ ";  
 $2'' - 2\frac{3}{16}''$ , nominal to  $-.025$  mm,  $-.0010$ ".

(1) Thrust ratings for stamping are 50% of radial ratings.

(2) Stampings must be ordered in pairs to assemble bearing.

Shaft diameter with an S = smaller housing.

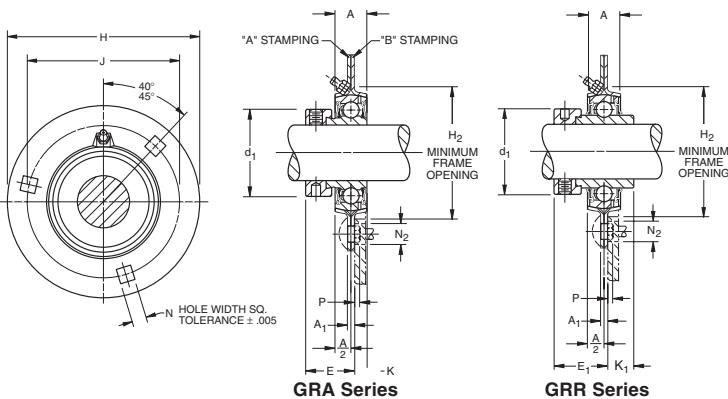

# BALL BEARINGS

## GRA AND GRR RELUBRICATABLE FLANGETTE UNITS

- Supplement to the standard non-relubricatable type.
- Zinc-plated and designed for relubrication in applications where excessive moisture and severe contamination are present.
- Relubricatable flangettes are dimensionally interchangeable with the non-relubricated types. Load ratings are also the same.
- Relubricatable units incorporate G-KRRB bearings and GRA-RRB inner ring bearings with positive contact land-riding seals and self-locking collars.
- Two stampings are needed to make a complete relubricatable flangette. Stamping A contains the boss for the grease fitting and a grease groove to allow grease to enter holes in the outer ring of the bearing. Stamping B contains a similar groove for the same purpose. With the grease groove in both stampings, the bearing can be reversed in the housing and still be relubricated.

**Suggested shaft tolerances:**  $\frac{1}{2}''$  -  $1\frac{15}{16}''$ , nominal to  $-.10$  mm,  $-.0005''$ ;  
 $2''$  -  $2\frac{3}{16}''$ , nominal to  $-.0255$  mm,  $-.0010''$ .

<sup>(1)</sup> Thrust ratings for stampings are 50% of radial ratings.

<sup>(2)</sup> Four bolt holes.

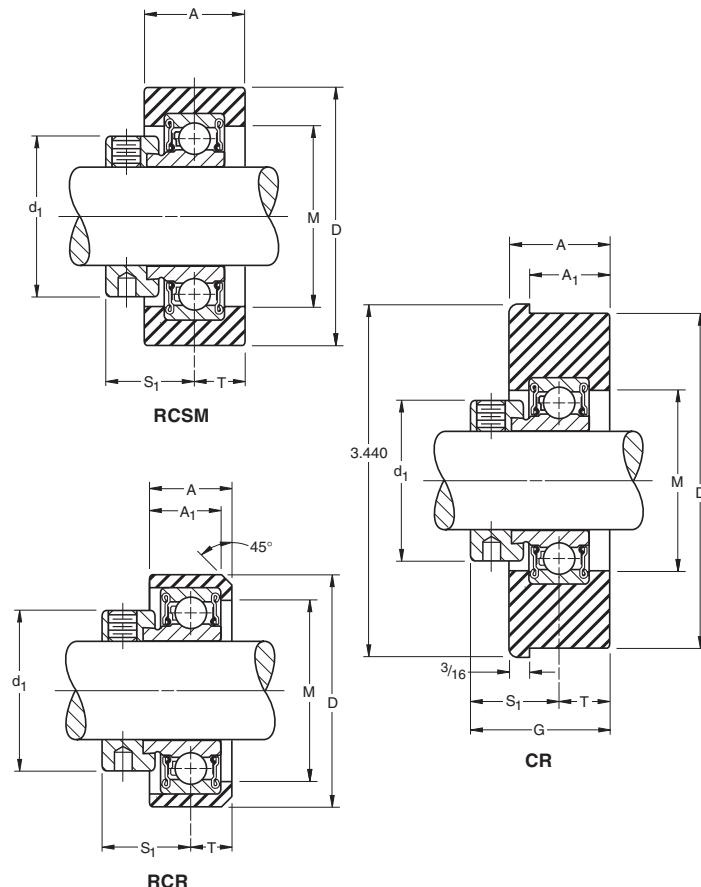

Shaft diameter with an S = smaller housing.

## RCSM, RCR, CR SERIES

- RCSM and RCR are quiet, synthetic, conductive rubber cylindrical cartridges designed for domestic heating, air-conditioning, ventilating equipment and other applications that require noise-free operation.
- All units are available with the RA-RRB extended inner ring bearings with positive contact land-riding seals and self-locking collar.
- Initial supply of grease is provided in the one-piece, non-relubricatable cartridges.
- Timken patented CR unit was designed to accommodate the wide tolerances of hot or cold rolled #10 gage (.134 in.), 3 1/2 in. O.D., electric resistance welded mechanical tubing similar to what is found in post office conveyor systems.

<sup>(1)</sup> Steady loads only. Thrust load is 1/3 radial load rating. Maximum suggested speed – 2400 RPM.

<sup>(2)</sup> Suffix for RA bearing is FS450 (RCSM and RCR Series).

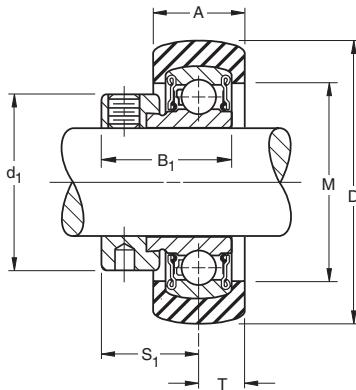

# BALL BEARINGS

## RABR HVAC SPECIAL SERIES

- Features a conductive rubber interliner to dissipate static charges.
- Quiet RA-RRB extended inner ring bearings are prelubricated and have positive-contact, land-riding seals with self-locking collars.
- RABR units can be mounted in tri-arm brackets or pressed-steel stampings.
- Maximum suggested speed: 2400 RPM.

Suggested housing diameter = Nominal (A) -.130 mm -.380 mm, -.005", -.015".

# BALL BEARINGS

## RTU INDUSTRIAL SERIES

- Ball bearing take-up units are used where shaft adjustment and belt-tightening devices are required, such as in conveyor applications.
- Both types of take-up units incorporate self-aligning B-Type wide inner ring ball bearings with self-locking collars
- Use a G-KRRB, R-Seal Type wide inner ring bearing.
- Provides compact, efficient supports for adjustable shafts and conveyer take-up pulleys.
- Units are factory prelubricated. A grease fitting is provided for relubrication if required.
- See preceding page for take-up frames to fit these units.
- Contact your Timken representative to discuss highly corrosive applications (e.g., food processing, chemical exposure) where Timken thin dense chrome coated bearings can be utilized.

Suggested shaft tolerances:  $\frac{3}{4}'' - 1\frac{15}{16}''$ , nominal to  $-.013$  mm,  $-.0005''$ ;  $2'' - 2\frac{15}{16}''$ , nominal to  $-.025$  mm,  $-.0010''$ .

# BALL BEARINGS

## VTU STANDARD SERIES

- Used where shaft adjustment and belt-tightening devices are required (e.g., conveyor belt applications).
- Provides shaft-aligning B-Type wide inner ring ball bearings with self-locking collars.
- Provides compact, efficient supports for adjustable shafts and conveyor take-up pulleys.
- Units are factory prelubricated. A grease fitting is provided for relubrication if required.
- See preceding pages for take-up frames to fit these units.

**Suggested shaft tolerances:**  $\frac{3}{4}'' - 1\frac{15}{16}''$ , nominal to  $-.013$  mm,  $-.0005$  in.  
 $2'' - 2\frac{15}{16}''$ , nominal to  $-.025$  mm,  $-.0010$  in.

## TTU INDUSTRIAL SERIES

- Used where shaft adjustment and belt-tightening devices are required (e.g., in conveyor belt applications).
- Incorporates self-aligning, B-Type, extra wide inner ring ball bearings with self-locking collars.
- Uses a G-KPPB4 (Tri-Ply) type wide inner ring bearing.
- Provides compact, efficient supports for adjustable shafts and conveyor take-up pulleys.
- Units are factory prelubricated. A grease fitting is provided for relubrication if required.
- Contact your Timken representative to discuss highly corrosive applications (e.g., food processing, chemical exposure) where Timken thin dense chrome coated bearings can be utilized.

Suggested shaft tolerances: 2"- 2 3/16", nominal to -.025 mm, -.0010".

# BALL BEARINGS

## IDLER PULLEY UNITS

- A pressed-steel pulley and a Timken precision ball bearing with rubber seals are combined to make a self-contained unit.
- Two pulley designs are available. One for V-belts and another for the backs of V-belts. Both are made for A, B, C and D section belts.
- A chain idler is available that is identical in construction to the flat idler, with the addition of an assembled rubber "tire" (part number A-10927). The rubber "tire" cushions the chain, preventing undue wear on the pulley surface or chain.
- Idler pulley units feature a Timken single-row radial ball bearing with an inner ring extended on both sides. This provides clearance for abutting parts and greater support on the shaft.
- Contact-type rubber seals assure positive retention for lubricant and full protection against dirt, dust and foreign matter.

- All units are non-relubricatable. Special features include smoothly rolled-over edges, eliminating belt chafing and scuffing. The "weep holes" on the rivet circle allow water drainage when the pulley is mounted in a horizontal position.

**TO ORDER, SPECIFY PULLEY NUMBER. Example: 008-10853 Idler Pulley.**

## ROLLER CHAIN IDLER SPROCKETS

- Sintered steel sprockets are hardened and provide an economical means of suitability.
- Replaces the hardened plate steel sprockets on most applications.
- All units are non-relubricatable.

**TO ORDER, SPECIFY SPROCKET NUMBER.** Example: 010-5017S Idler Sprocket.

# BALL BEARINGS

## HOUSED UNITS REPLACEMENT CHART

Housed Units	Replacement Bearing Assembly	Features	Part Number
C	MUB replaced by 1000KRB & Col.	Standard Series (SM) wide inner ring (B-Type), collar, caps, and wire	Example: 2 $\frac{1}{16}$ inch (uses MUB 2 $\frac{1}{16}$ inch)
DRNR	1000KR & Col. (Two)	Single R-Seal (A-Type), complete bearing number marked on seal	Example: DRNR 1 $\frac{3}{16}$ inch (uses two 1103KR & Col.)
FLCT	RA000RRB & Col.	Non-Relubricatable; B-Spherical outer ring; RR-Double R-Seal	Bearing identification marked on seal.
GRFD, GRFDR, GRFTD, GRTDR	G1000KRRB & Col.	G-Relubricatable; B-Spherical outer ring; RR-Double R-Seal	Complete bearing number marked on seal. Example: GRFD 1 $\frac{3}{16}$ inch (uses G1103KRRB & col.)
GRKD, GRSD	G1000KRRB & Col.	G-Relubricatable; B-Spherical outer ring; RR-Double R-Seal	Complete bearing number marked on seal. Example: GRKD 1 $\frac{3}{16}$ inch (uses G1103KRRB & Col.)
GVFD, GVFDR, GVFTD, GVFTDR	GRA000RRB & Col.	G-Relubricatable; B-Spherical outer ring; RR-Double R-Seal	Bearing identification marked on seal.
GVKD, GVSD	GRA000RRB & Col.	G-Relubricatable; B-Spherical outer ring; RR-Double R-Seal	Bearing identification marked on seal.
LAK, LAS	G1000KLLB & Col.	G-Relubricatable; B-Spherical outer ring; LL-Double Mechani-Seal	Complete bearing number marked on seal. Example: LAK 1 $\frac{3}{16}$ inch (uses G1103KLLB & Col.)
LAKHL	1000KLS & Col.	L-Single Mechani-Seal; S-External self-aligning	Complete bearing number marked on seal. Example: LAKHL 1 $\frac{3}{16}$ inch (uses 1103KLS & Col.)
LAO, LSAO	GN000KLLB & Col.	G-Relubricatable; B-Spherical outer ring; LL-Double Mechani-Seal	Complete bearing number marked on seal. Example: LAO 1 $\frac{3}{16}$ inch (uses GN103KLLB & Col.)
LCJ, LCJT	G1000KLLB & Col.	G-Relubricatable; B-Spherical outer ring; LL-Double Mechani-Seal	Complete bearing number marked on seal. Example: LCJ 1 $\frac{3}{16}$ inch (uses G1103KLLB & Col.)
LCJO	GN000KLLB	G-Relubricatable; N-Heavy Series; B-Spherical outer ring; LL-Double Mechani-Seal	Complete bearing number marked on seal. Example: LCJO 1 $\frac{3}{16}$ inch (uses GN103KLLB & Col.)
PB, PBS, VKD, VSD	RA000RRB & Col.	Non-Relubricatable; B-Spherical outer ring; RR-Double R-Seal	Bearing identification marked on seal.
RA Flangette, RAT Flangette	RA000RRB & Col.	Non-Relubricatable; B-Spherical outer ring; RR-Double R-Seal	Bearing identification marked on seal.
RA Relubricatable Flangette	GRA000RRB & Col.	G-Relubricatable; B-Spherical outer ring; RR-Double R-Seal	To order, specify bearings & markings, Example: 1-GRA103RRB & Col., 1-G62MSA marking, 1-G62MSB marking
RAK, RAS, RAKH, RSA	G1000KRRB & Col.	G-Relubricatable; B-Spherical outer ring; RR-Double R-Seal	Complete bearing number marked on seal. Example: RAK 1 $\frac{3}{16}$ inch (uses G1103KRRB & Col.)
RAKHL	1000KRS & Col	R-Single R-Seal; S-External self-aligning	Complete bearing number marked on seal. Example: RAKHL 1 $\frac{3}{16}$ inch (uses 1103KRS & Col.)
RAKN, RASN	1000KRRB & Col.	Non-Relubricatable; B-Spherical outer ring; RR-Double R-Seal	Complete bearing number marked on seal. Example: RAKN 1 $\frac{3}{16}$ inch (uses 1103KRRB & Col.)
RAO, RSAO	GN000KRRB & Col.	G-Relubricatable; B-Spherical outer ring; RR-Double R-Seal	Complete bearing number marked on seal. Example: RSAO 3 $\frac{3}{16}$ inch (uses GN303KRRB & Col.)
RASC	GC1000KRRB & Col.	G-Relubricatable; C-Concentric collar; B-Spherical outer ring; RR-Double R-Seal	Complete bearing number marked on seal. Example: RASC 1 $\frac{3}{16}$ inch (uses GC1103KRRB & Col.)
RCJ, RCJT, RC	G1000KRRB & Col.	G-Relubricatable; B-Spherical outer ring; RR-Double R-Seal	Complete bearing number marked on seal. Example: RCJ 1 $\frac{3}{16}$ inch (uses G1103KRRB & Col.)
RCJN, RR Flangette, RRT Flangette	1000KRRB & Col.	Non-Relubricatable; B-Spherical outer ring; RR-Double R-Seal	Complete bearing number marked on seal. Example: RCJN 1 $\frac{3}{16}$ inch (uses 1103KRRB & Col.)
RFC, RCJC, RCJTC	GC1000KRRB & Col.	G-Relubricatable; C-Concentric collar; B-Spherical outer ring; RR-Double R-Seal	Complete bearing number marked on seal. Example: 1 $\frac{3}{16}$ inch (uses GC1103KRRB & Col.)
RFD, RFDR, RFTD, RFTDR	1000KRRB & Col.	Non-Relubricatable; B-Spherical outer ring; RR-Double R-Seal	Complete bearing number marked on seal. Example: RFD: 1 $\frac{3}{16}$ inch (uses 1103KRRB & Col.)

Housed Units	Replacement Bearing Assembly	Features	Part Number
RKD, RSD	1000KRRB & Col.	Non-Relubricatable; B-Spherical outer ring; RR-Double R-Seal	Complete bearing number marked on seal. Example: RKD 1 3/16 inch (uses 1103KRRB & Col.)
RPB	RABR (Shaft Size)	Non-Relubricatable; B-Spherical outer ring; RR-Double R-Seal	RA000RRB FS-450 Bearing & Col. mounted in rubber interliner. Example: RPB 1 3/16 (uses an RABR 1 3/16 inch)
RR Relubricatable Flangette	G1000KRRB & Col.	G-Relubricatable; B-Spherical outer ring; RR-Double R-Seal	To order, specify bearing & markings, Example: 1-G1100KRRB & Col., 1-G52MSA marking, 1-G52MSB marking
SA	MUB replaced by 1000KRB & Col.	Standard Series (SM) wide inner ring bearing (B-Type), collar, caps and wire	Example: SA 1 3/16 inch (uses MUB 1 3/16 inch)
SAD	MUBD replaced by 1000KRB & Col.	Standard Series (SM) wide inner ring bearing (B-Type), dust seal, collar, caps and wire	Example: SA 1 3/16 inch (uses MUB 1 3/16 inch)
SADD	MUBD replaced by N000KRB & Col.	Rear dust seal, otherwise same as SAD	
SAL	SM100KS & Col.	S-External self-aligning ring	Example: SAL 1 3/16 inch (uses SM1103KS & Col.)
SAO	MUOB replaced by 100KRB & Col.	Heavy Series (SMN) wide inner ring bearing (B-Type), collar, caps and wire	Example: SAO 1 3/16 inch (uses MUOB 1 3/16 inch)
SAOD	MUOBD (Shaft Size)	Heavy Series (SMN) wide inner ring bearing (B-Type), dust seal, collar, caps and wire	Example: SAOD 1 3/16 inch (uses MUOBD 1 3/16 inch)
SAODD	MUOBD (Shaft Size)	Rear dust seal, otherwise same as SAOD	
SAOL	SMN000KS & Col.	S-External self-aligning ring Heavy Series	Example: SAOL 1 3/16 inch (uses SMN103KS & Col.)
SAS, SAK	GYA000RRB	G-Relubricatable; B-Spherical outer ring; RR-Double R-Seal	Bearing identification marked on seal.
SCJ, SCJT	GYA00RRB	G-Relubricatable; B-Spherical outer ring; RR-Double R-Seal	Bearing identification marked on seal.
TAK, TAS	G1000KPPB & Col.	G-Relubricatable; B-Spherical outer ring; PP-Double Tri-Ply-Seal	Complete bearing number marked on seal. Example: TAK 1 3/16 inch (uses G1103KPPB3 & Col.)
TCJ, TCJT	G1000KPPB & Col.	G-Relubricatable; B-Spherical outer ring; PP-Double Tri-Ply Seal	Complete bearing number marked on seal. Example: TCJ 1 3/16 inch (uses G1103KPPB3 & Col.)
VAK, VAS	GRA000RRB & Col.	G-Relubricatable; B-Spherical outer ring; RR-Double R-Seal	Bearing identification marked on seal.
VCJ, VCJT	GRA000RRB & Col.	G-Relubricatable; B-Spherical outer ring; RR-Double R-Seal	Bearing identification marked on seal.
VFD, VFDR, VFTD, VFTDR	RA000RRB & Col.	Non-Relubricatable; B-Spherical outer ring; RR-Double R-Seal	Bearing identification marked on seal.
YAS, YAK, YASM YCJ, YCJT, YTU	GY-KRRB	G-Relubricatable; B-Spherical outer ring; RR-Double R-Seal Y-Series wide inner ring	Bearing identification marked on seal.

**OTHER TYPES**

LTU Take-Up	G1000KLLB & Col.	G-Relubricatable; B-Spherical outer ring; LL-Double Mechani-Seal	Complete bearing number marked on seal. Example: LTU 1 3/16 inch (uses G1103KLLB & Col.)
RHC, RHCM Hanger	GC1000KRRB & Col.	G-Relubricatable; C-Concentric collar; B-Spherical outer ring; RR-Double R-Seal	Complete bearing number marked on seal. Example: RCH 1 1/2 inch (uses GC1108KRRB & Col.)
RTU Take-Up	G1000KRRB & Col.	G-Relubricatable; B-Spherical outer ring; RR-Double R-Seal	Complete bearing number marked on seal. Example: RTU 1 3/16 inch (uses G1103KRRB & Col.)
STU Take-Up	GYA-RRB	G-Relubricatable; B-Spherical outer ring; RR-Double R-Seal	Complete bearing number marked on seal. Example: STU 1 3/16 inch (uses GYA103RRB)
TU Take-Up	MUB replaced by 1000KRB & Col.	Standard Series (SM) wide inner ring bearing (B-Type), collar, caps and wire	Example: TU 2 1/16 inch (uses MUB 2 1/16 & Col.)
YTU Take-Up	GY-KRRB	G-Relubricatable; B-Spherical outer ring; RR-Double R-Seal; Y-Series wide inner ring with setscrew lock	Complete bearing number marked on seal. Example: YTU 1 3/16 inch (uses GY1103KRRB)

## MACHINE UNITS

A complete machine unit consists of either a standard (SM) or heavy (SMN) Series wide inner ring bearing, an inner and outer sealing cap, a retaining wire and self-locking collar – or an integrally sealed bearing and collar. These units are available as bearing replacements for Timken power transmission units such as the SA, SAO, DSA and DSAO pillow blocks, C and Co cylindrical cartridges or special housings.

The "caps" are two steel members which comprise a non-integral frictionless labyrinth seal. The inner member is pressed on

the inner ring and rotates with it. The outer member is pressed in the housing against the face of the outer ring and is held in place by the round retaining wire.

The A-Type unit is designated MUA (standard series) or MUOA (heavy series); the B-Type MUB (standard series) or MUOB (heavy series). The B-Type bearing is mounted in the spherical housing seat by means of two slots milled diametrically opposite each other in the housing. The bearing can be inserted at right angles and swiveled into position.

### A-TYPE

Figure 1 shows a machine unit with an A-Type bearing carrying the designation MUA (standard series) and MUOA (heavy series). It consists of a wide inner ring, open type or one-piece R-seal bearing, collar, caps and wire. The "caps" are two steel members which comprise a non-integral frictionless labyrinth seal. The inner member is pressed on the inner ring and rotates with it. The outer member is pressed in the housing against the face of the outer ring and is held in place by the round retaining wire.

**A-Type units are being converted to a KR-Type bearing with collar, B-Type cap and wire.**

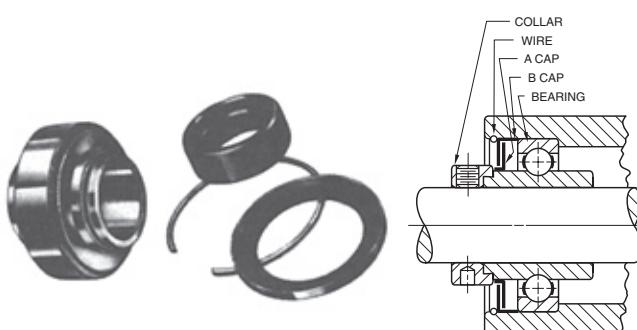

Figure 1 – MUA, MUOA

### B-TYPE

Figure 2 is the same as Figure 1, except that the bearing is B-Type and seal on collar side is either a labyrinth seal (as shown) or a one-piece R-Seal. In the latter case no wire is supplied. The designation of the machine unit is MUB (standard series) or MUOB (heavy series). The B-Type bearing is mounted in the spherical housing seat by means of two slots milled diametrically opposite each other in the housing. The bearing can be inserted at right angles and swiveled into position. No additional shoulders or snap rings are required to locate this type.

**B-Type units are being converted to a KRB-Type bearing and collar.**

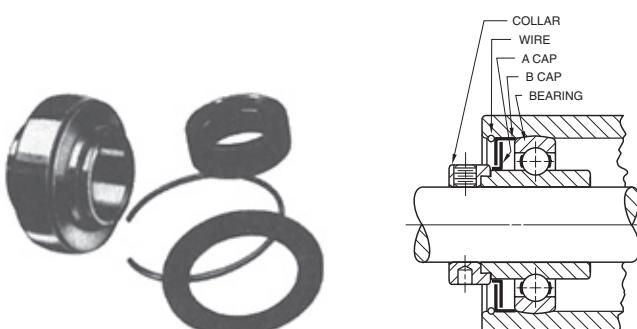

Figure 2 – MUB, MUOB

## TIMKEN® SAFETY END CAPS MAKE WORKPLACE PROTECTION A SNAP

Easy-to-install Timken Safety End Caps protect exposed rotating shafts, reducing hazards around many types of equipment. The patent-pending design meets all applicable OSHA requirements.

The Timken safety product line consists of a mounting ring and snap-on cover, both molded in durable, bright yellow polymer. The end cap snaps into the adhesive-backed ring that adheres to the outboard face of most flanged bearing housings. The secure 360 degree fit makes for a rugged unit that also provides basic protection and washdown.

Factory retrofits are a snap with everything provided in a handy kit. The cost-effective end covers are simple to install on Timken and most other flanged units. Current sizes range from  $\frac{3}{4}$  in. to  $1\frac{15}{16}$  in. (20 mm to 50 mm) shaft sizes for two or four-bolt flanged cast iron, malleable iron, and other selected housing styles and sizes.

Safety end caps protect against rotating stub shafts.

### KIT CONTENTS

Timken safety end caps come in a convenient kit that contains everything required for a safe and durable mounting:

- Polymer end cap
- Adhesive-backed polymer mounting ring
- Scuffing pad
- Cleaning cloth

### INSTALLATION

Steps in the simple mounting procedure include:

1. Use the scuffing pad on housing's mating surface where the mounting ring will be placed.
2. Clean off mounting area.
3. Attach adhesive-backed mounting ring.
4. Hold mounting ring in place with pressure for 60 seconds.
5. Allow adhesive to set for minimum of one hour.
6. Snap end cap into place.

### ORDERING INFORMATION

Kit *	Shaft Sizes
204 ECY KIT	$\frac{3}{4}$ , 20 mm
205 ECY KIT	$\frac{7}{8}$ , $1\frac{15}{16}$ , 1, 25 mm
206 ECY KIT	$1\frac{1}{16}$ , $1\frac{1}{8}$ , $1\frac{3}{16}$ , $1\frac{1}{4}$ S, 30 mm
207 ECY KIT	$1\frac{1}{4}$ , $1\frac{5}{16}$ , $1\frac{3}{8}$ , $1\frac{7}{16}$ , 35 mm
208 ECY KIT	$1\frac{1}{2}$ , 40 mm
209 ECY KIT	$1\frac{5}{8}$ , $1\frac{11}{16}$ , $1\frac{3}{4}$ , 45 mm
210 ECY KIT	$1\frac{15}{16}$ , 2 S, 50 mm

\* Kits are designed to fit the following housed units -  
4-Bolt: YCJ, RCJ, RCJC, TCJ, LCJ, SCJ, VCJ  
2-Bolt: YCJT, RCJT, RCJTC, TCJT, LCJT, SCJT, VCJT

## TIMKEN BALL BEARING PILLOW BLOCK GREASE

Timken Ball Bearing Pillow Block grease is a NLGI No. 2 polyurea-thickened grease. It provides outstanding long-life, moderately high-temperature lubrication to ball bearings. This grease maintains its mechanical shear stability and provides corrosion resistance, even in the presence of salt water. Timken Ball Bearing Pillow Grease features low-noise characteristics and excellent pumpability. This grease does not contain extreme-pressure additives but is inhibited against rust and oxidation. Operating temperatures range from -40° F to 400° F (-40° C to 163° C). This grease is typically used in lightly loaded ball bearings in pillow blocks and conveyors that operate in high-temperature environments, including kiln and glasswork applications, electric motors, chemical manufacturing and noise-sensitive environments.

### SINGLE-POINT AND CENTRALIZED MULTI-POINT LUBRICATORS

Proper lubrication is critical to bearing and machine performance. To help prevent damage, Timken G-Power and M-Power single-point lubricators deliver periodic grease to bearings, chains, guideways and other industrial equipment components. You can choose from gas-powered or electromechanical varieties to meet your operating specifications. C-Power multi-point lubricators are a centralized lubrication system capable of delivering grease to up to six lubrication points. Oil is not an option for this unit.

G-Power and M-Power and C-Power canisters can be filled with Timken-formulated lubricants or many other types of commercial lubricants. A full line of accessories – including brackets, clamps, brushes, fittings and hose extensions – ease installation and offer a host of mounting options for hard-to-reach locations.

### LUBRICATION

The Timken Company understands the importance of friction management. Our line of application- and environment-specific lubricants have been developed by leveraging our knowledge of tribology and anti-friction bearings and how these two elements affect overall system performance.

Timken lubricants help bearings and related components operate effectively in demanding industrial operations. High temperature, anti-wear and water-resistant additives offer superior protection in challenging environments.

Similar to our bearings, all Timken lubricants are backed by highly trained customer service and technical support. Industrial customers turn to Timken for comprehensive friction management solutions, and we help customers analyze performance and suggest options that make sense for their unique operating conditions and maintenance intervals.

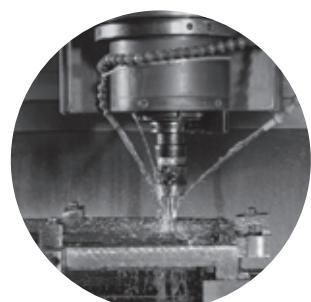

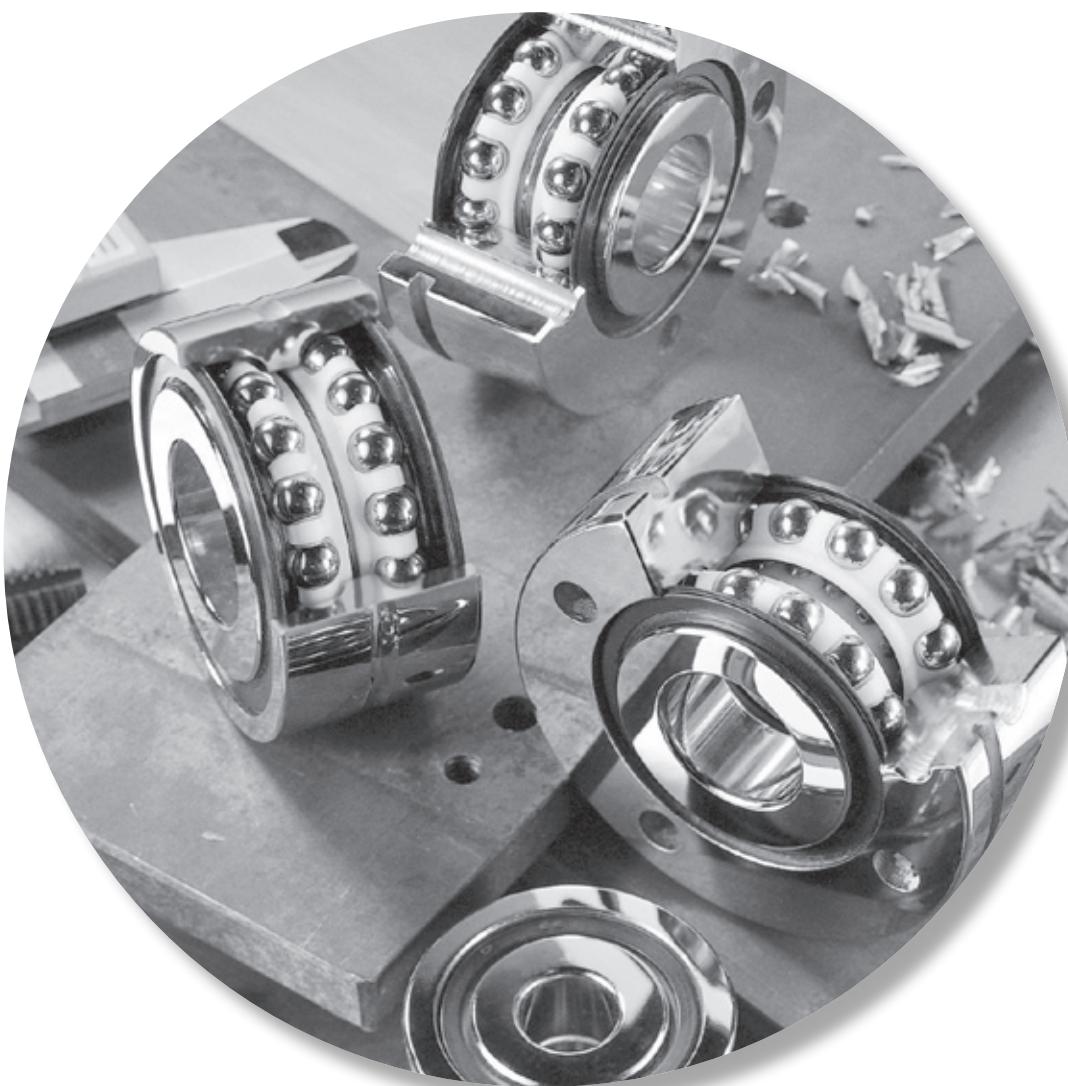

D

## SUPER PRECISION MACHINE TOOL BEARINGS

**Overview:** Timken is a premier manufacturer of Fafnir® super precision machine tool ball bearings. From standard catalog ABMA/ISO designs to custom sizes and features, Timken has the super precision ball bearing to meet your needs.

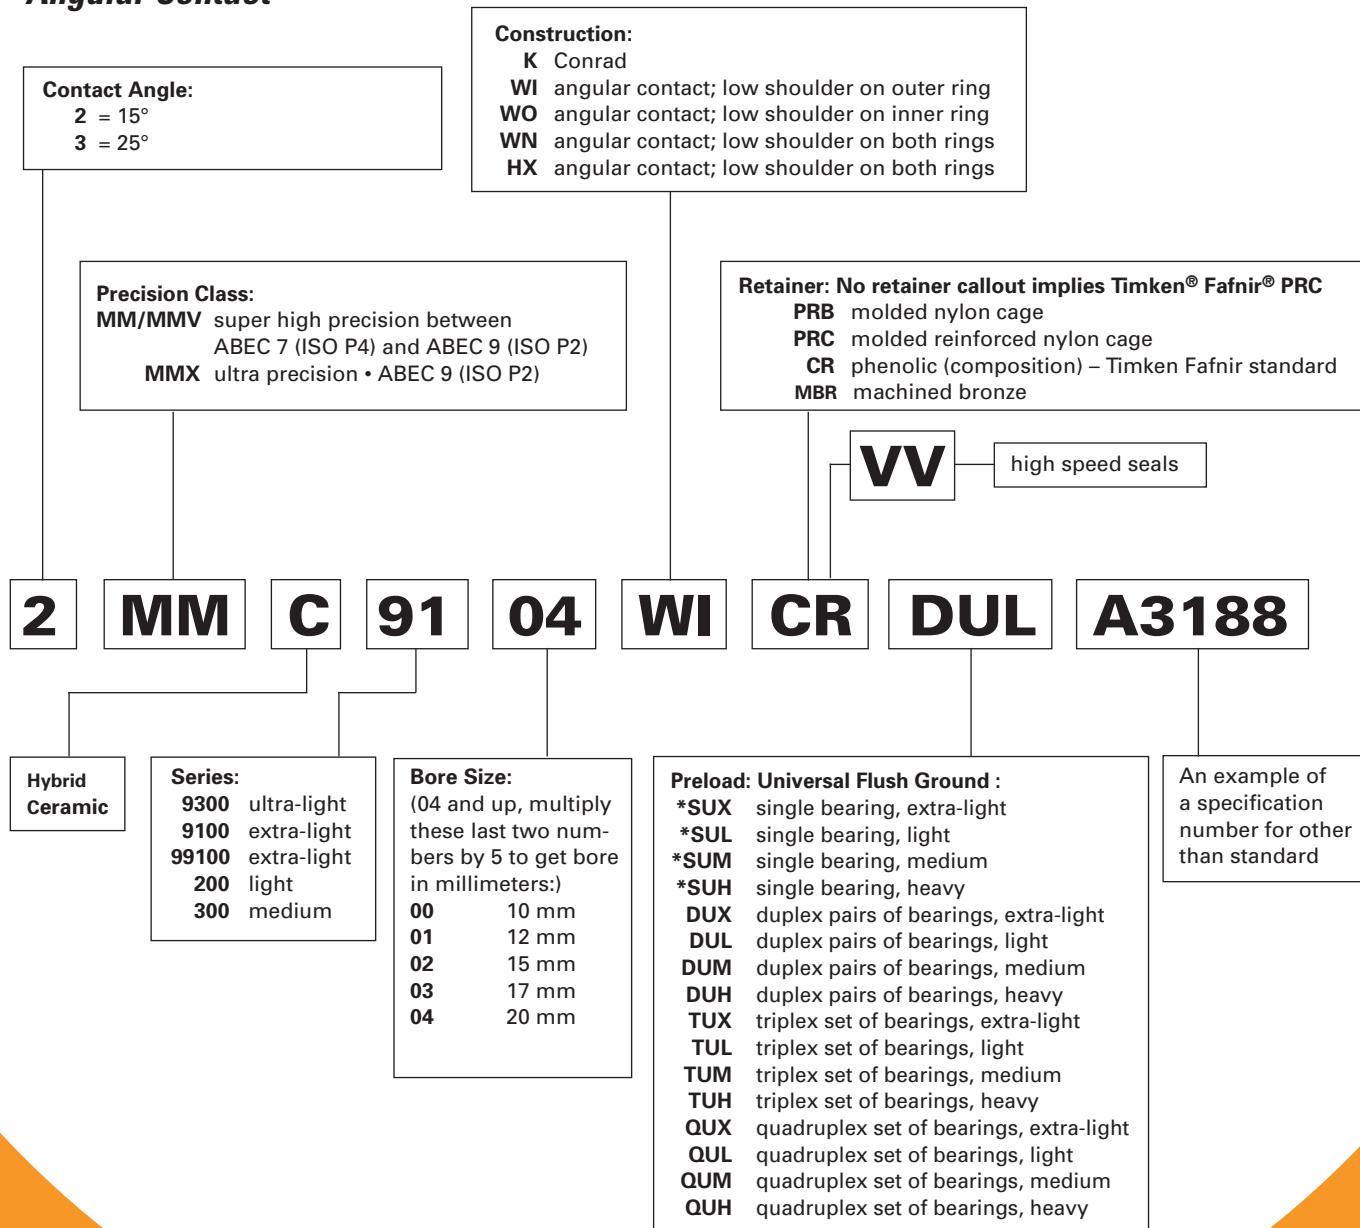

- **Sizes:** 10 mm - 300 mm (.3937 in. - 11.8110 in.) bore.  
26 mm - 400 mm (1.0236 in. - 15.7480 in.) O.D.
- **Markets:** High speed machine tool spindles, high stiffness ball screw support systems, low noise “quiet” bearings, aircraft generator, defense.
- **Features:** ABMA ABEC 7/9 (ISO P4/P2) precision level angular contact 15°, 25°, 60°; single and double-row ball screw; high speed seals’ ceramic balls; advanced materials.
- **Benefits:** Very high speed; high accuracy; high stiffness; low operating temperature; low noise; low vibration.
